Boletín de Oportunidades de Cooperación: TIC - 15/4/2020

Oportunidades de cooperación tecnológica: Búsquedas de Socios

[EUREKA] A Korean company specialized in wireless chip solution is seeking partners to co-develop "AI-based real-time bidirectional massive IoT technology" for the advanced LPWA (Low-power Wide-area) through 2020 EUREKA project

Update: 2020-04-14 - Deadline: 2020-05-31

A Korean company expertise in wireless communication is looking for collaborative partners for EUREKA project in 2020. The company wishes to co-develop "AI-based bidirectional massive IoT technology" for advanced LPWA (Low-power Wide-area). While the company contributes its expertise in wireless modem, MAC (Medium Access Control), and gateway for wireless IoT, the potential partner is expected to contribute MAC protocol & service for wireless IoT and also have network in Spain, France, and etc.

H2020 FETOPEN-01-2018-2019-2020 - SME in bioelectronics, miniature OLED or microLEDs displays are sought for development of biocompatible optogenetic stimulators

Update: 2020-04-09 - Deadline: 2020-04-22

A French Institute proposes to design and test radically new strategies for auditory rehabilitation by direct stimulation of the main sound processing center in the brain, the auditory cortex. The goal of this FET-Open project is to develop new generation biocompatible optogenetic stimulators to photoactivate precise groups of neurons in auditory cortex. Different bio-inspired or machine learning inspired algorithms will be tested. A bioelectronics company is sought as a partner.

Fast Track to Innovation (FTI) : development tool for non-programmers to facilitate implementation of data acquisition, processing and analysis pipelines

Update: 2020-04-06 - Deadline: 2020-05-07

A software languages lab hosted by a Belgian university will coordinate a FTI (H2020) to bring to the market an accessible development tool that radically diminishes the time and cost involved in implementing data acquisition, processing and analysis pipelines. They are looking for a consortium partner who relies on the collection of data in order to create or optimise

products/services (IoT, industry 4.0, smart cities, fleet and asset management, telematics, etc.) for research cooperation.

[H2020-MSCA-IF-2020: Data or business analyst (PhD) or researcher with several years of experience in computer science or related discipline sought for designing and developing HyperCards](#)

Update: 2020-04-14 - Deadline: 2020-07-17

A German SME develops customised HyperIntelligenceCards based on the leading technology of MicroStrategy. Data or business analyst (PhD)/experienced researcher in computer science or related discipline is sought within Society & Enterprise Panel of Individual Fellowships of Marie-Skłodowska-Curie actions. He/she should contribute to further design and develop the HyperCards, as well as enhance the intuitive user experience and data exploration.

[Scottish (UK) SME seeks a European go-to-market partner in the Construction sector for their Artificial Intelligence innovation and an EIT Digital 2021 funding application](#)

Update: 2020-04-15 - Deadline: 2020-04-30

The Scottish SME is one of the UK's leading smart cities specialists and creators of an innovative data platform. The SME are seeking a go-to-market partner for their Artificial Intelligence (AI) innovation in the Construction sector to partner with for an EIT Digital funding application. The AI product increases the re-use of materials within large construction companies by better management and re-use of materials between sites and projects and also highlights inter-company opportunities.

Oportunidades de cooperación tecnológica: Demandas

[A Dutch transport company is looking for sustainable methods and techniques to secure the cargo in cages, without using plastic.](#)

Update: 2020-04-08 - Deadline: 2021-04-09

A Dutch transport company is involved in less-than-truckload, full-truckload and network distribution of cargo. In order to operate more sustainably, the company is looking for new ideas, methods and techniques to secure the cargo in the cages, without using plastic or other environmentally harmful materials. Cooperation with partners is sought and a research or a technical cooperation agreement is foreseen. This request refers to an innovation challenge published on an open platform.

Oportunidades de cooperación tecnológica: Ofertas

[Greek SME offers an integrated smart water meter platform of advanced technology and water meters, looking for companies dealing with water networks for technical or commercial collaborations](#)

Update: 2020-04-09 - Deadline: 2021-04-10

An experienced Greek IT company, dealing with telematics solutions, offers an integrated smart water platform. The platform includes a series of smart meters able to provide remotely information about consumption and damages. It also includes a software suite for the control of

the water network. The company is looking for either water suppliers for technical collaboration or companies that provide equipment for commercial agreement.

[COVID-19: Wearable front-line medical operators communication system](#)

Update: 2020-04-06 - Deadline: 2021-04-07

An innovative Italian company has developed a communication platform integrated with wearable devices to support front-line medical operators (nurses, triage-pretriage operators, care-givers) to communicate with a centralized medical center or to collect patients vital parameter, with full hands free approach. The company is looking for partners for commercial agreements with technical assistance to enhance the use of the platform in hospitals, local health authorities and private biotech firms.

[Real 3D forming touch table for interactive 3D geographical information system](#)

Update: 2020-04-07 - Deadline: 2021-04-08

A Greek SME with expertise in geo-information systems, unmanned aerial vehicles and remote sensing presents a novel product for the visualization of geospatial information upon 3D soil or sand formations. It incorporates the miniature/avatar placement and VR components and includes earth observation satellite paradigms. Private and public companies and organisations are sought interested to collaborate under the framework of commercial agreement with technical assistance.

[Adaptive LCD-based Optical Filter (LCD - liquid crystal display) for Optical Wireless Communication Systems](#)

Update: 2020-04-08 - Deadline: 2021-04-09

A German university has developed an adaptive LCD-based optical filter for improving the performance of optical wireless communication systems by effective interference suppression, light equalization, and light angle determination. License agreements (or transfer of rights) and research cooperation agreements are offered to industrial partners from sensor and display technology sector.

Oportunidades de cooperación empresarial: Demandas

Oportunidades de cooperación empresarial: Ofertas

[COVID-19 Prevention tool - mobile location data and technology to help control and stunt growing worldwide COVID19 pandemic.](#)

Update: 2020-04-09 - Deadline: 2021-04-10

The company from central Poland offers a data management system. Existing datasets include mobile location data allow to track and identify devices near to poisoned people. Tool's tracking system is able to warn people around they might be at high risk and they should obey social isolation rules. It uses in-app display technology to communicate with society and increase their awareness of COVID-19. The tool is addressed mainly to government ministries, research units, health organizations.

[A Turkish company manufacturing autonomous condition monitoring systems and autonomous vibration analysis equipment is looking for distributorship agreements](#)

Update: 2020-04-09 - Deadline: 2021-04-10

The Turkish company aims to provide autonomous condition monitoring systems for predictive maintenance and takes part in R&D projects on vibration and sound analysis, asset tracking systems as Industry 4.0 solutions. It is founded in Turkey and seeks distributorship agreements.

[An Ukrainian IT-design agency offers UX (user experience) and UI (user interface) design development services, under outsourcing service agreements](#)

Update: 2020-04-09 - Deadline: 2021-04-10

The Ukrainian IT-design agency provides its UX and UI top-notch experience in interface graphic design and other types of software developments for startups and smart companies, under outsourcing service agreements.

[Bulgarian company offering machining of metal components is looking for commercial agents](#)

Update: 2020-04-11 - Deadline: 2021-04-12

A Bulgarian CNC /computer numerical control/ machine shop is looking for commercial agents on the EU market in the following fields: electronics, bike industry, sports goods. The company specializes in low-cost production of small 3 and 4-axis aluminum components. Commercial agency agreements are sought. Direct subcontracting agreements are also welcomed.

[Romanian technology start-up offers cloud technology for booking, dispatching and management of fleet operations, for licensing or commercial agreements.](#)

Update: 2020-04-09 - Deadline: 2021-04-10

A Romanian IT company has developed a proprietary cloud technology for management and fleet automation of the companies operating in the area of ground transportation, such as taxi, shuttle, cargo, deliveries, etc.. The system provides full control over the fleet, better time management and the reducing of the total costs of the company, especially fuel costs and man hour costs. The company is looking for partners to offer license or commercial agreements.

[Ukraine IT company, creator of the proprietary e-commerce platform is looking for partners to conclude commercial agency agreement.](#)

Update: 2020-04-14 - Deadline: 2021-04-15

The company from Ukraine, which develops and delivers a cutting-edge digital commerce platform in commerce as a service model. This digital commerce platform supports B2B, B2C, marketplace and omnichannel sales models and is best suited for businesses with gross merchandise value over $5m. The company is currently looking for partners, specialized in B2B sales, to sign a long-term relationship commercial agency agreement

[An Irish based company engaged in the manufacturing of rifle sound moderators seeks a distribution services agreement with a recognised wholesaler or distributor of hunting and sporting equipment in their own country of operation](#)

Update: 2020-04-07 - Deadline: 2021-04-07

An Irish company that designs and manufactures sound moderators for rifles used in hunting and sporting events seeks a distribution services agreement with a recognised wholesaler or distributor with a retail client base in the hunting and sporting sector worldwide. The moderator is a muzzle device that reduces the sound intensity and muzzle flash when a firearm or air gun is discharged.
