[Development of novel surfaces to optimise haptic properties of products in various sectors](#)

Update: 2020-04-22 - Deadline: 2021-04-23

An Austrian R&D institute is developing a new technology aiming to quantify the haptic appearance of a product via its surface and material properties. The institute seeks partners to develop this technology and to use it profitably. The aim is to produce product surfaces with the desired haptics, to predict the haptics of new products and to evaluate new surfaces. Both virtual reality and artificial intelligence are used. The institute seeks partners for technical and/or research cooperation.

[Robotized mushroom harvesting technology sought by leading Dutch mushroom company](#)

Update: 2020-04-27 - Deadline: 2021-04-28

A leading Dutch company active in the entire mushroom supply chain faces shortages in the labour market and rising labour costs. Therefore it wants to robotize the mushroom harvesting process. The company is looking for partners that offer technology to pick mushrooms from different shelves in a narrow growing room. It aims to set up a pilot proving the technical and economical feasibility of such a system within the framework of a commercial agreement with technical assistance.

[Seeking technologies that maximise customer engagement for artificial intelligence-assisted predictive marketing system](#)

Update: 2020-04-27 - Deadline: 2021-04-28

A Singapore games development SME seeks technologies related to chatbots, marketing, machine learning and statistics, data analysis for an artificial intelligence (AI)-assisted predictive marketing and community management system. The proposed solution will empower marketers

to craft personalised content and messages and maximise customer engagement. European SMEs with the sought technologies/capabilities are welcome to collaborate via a licensing/ research partnership.

Oportunidades de cooperación tecnológica: Ofertas

[French SME offers a plug-in for the digital accessibility of websites to disabled or elderly people](#)

Update: 2020-04-23 - Deadline: 2021-04-24

A French computing SME has developed a plug-in that enables a website to be accessible to disabled or elderly people by adapting the structure and display according to the type of disability of each visitor. The SME is looking for technical cooperation agreement or commercial agreement with technical assistance with authorities or companies operating in sales of products or services for disabled or elderly people, to co-develop and implement the technology into their website.

[Hospitals and clinicians are sought to validate a decision tool assistance](#)

Update: 2020-04-21 - Deadline: 2021-04-22

The French company has developed an advanced analytical solution for clinical purposes. They are using machine learning and natural language processing (NLP) to make an assessment of an illness or a disorder in a systemic way. The first objective is to provide a conceptual model for exploring and modeling the risk of specific mental health illnesses or disorders. Research and technical cooperation through practitioners are sought to validate this decision tool assistance.

[A wearable continuous learning environment](#)

Update: 2020-04-24 - Deadline: 2021-04-25

An innovative Italian company has developed a Ready2Use communication platform integrated with wearable devices to drive and manage any kind of field Work-Flow by enabling hands-free real-time collaboration among productive resources. Operators can benefit from both live support approach and a full set of tools for inspection checklists. The SME is interested in commercial agreements with technical assistance with partners or end users such as: manufacturing firms, service providers, utilities.

[Machine learning generative models for synthetic dataset creation](#)

Update: 2020-04-23 - Deadline: 2021-04-24

An Italian start-up uses state of the art tools and techniques from Artificial Intelligence and Machine Learning to optimize business operations. They offer a specific product, which leverages recent advances in generative Machine Learning to enable safe and Privacy Law-compliant data sharing between companies. They look for industrial partners to test the beta version available for demonstration within technical cooperation agreements or to apply to research calls for project.

[Design of new alloys and materials using sparse and noisy data sets](#)

Update: 2020-04-22 - Deadline: 2021-04-22

A UK spin out has launched, and proven, an artificial intelligence (AI) based tool that incorporates experimental data and uncertainty. It helps guide organisations to the best possible material or chemical optimisation in around 90% fewer experiments. New alloys and superalloys have been designed, and small molecule drugs. Industries with a need for new materials or chemicals are sought for commercial agreements with technical assistance or technical cooperation agreements.

[Method for assessing the fertilising potential of sperm by computer-aided sperm analysis](#)

Update: 2020-04-23 - Deadline: 2021-04-22

A German university offers a method to assess the fertilising potential of sperm. It is based on longitudinal axis rotation within the framework of computer-aided sperm analysis (CASA). The diagnostic power of these systems is thus significantly improved. Providers of computer-aided sperm analysis systems are sought for license agreements.

Oportunidades de cooperación empresarial: Demandas

Oportunidades de cooperación empresarial: Ofertas

[Polish specialist in repairing electronic systems in controllers seeks commercial agents.](#)

Update: 2020-04-24 - Deadline: 2021-04-25

The Polish company specializes in repairing electronic components of high-speed gate drivers and is looking for partners who are experienced service companies in the field of industrial high-speed gates, that will act as regional representatives and acquire customers. The company has experience in servicing dozens of customers from abroad in the field of repairing single controllers. The cooperation is envisaged under a Commercial agency agreement.

[A Turkish SME that offers an economical way of developing aerodynamic models for top level D type professional flight simulators seeks manufacturers of such simulators.](#)

Update: 2020-04-21 - Deadline: 2021-04-22

An SME specializes in dynamic modeling, simulation, and control system development for aerospace applications and has experience in rotorcraft, turbine engines, and wind turbines. Much of the capability is used starting from consultancy to software development of sub-systems to fully integrated FNPT (flight navigation procedure trainer)-type simulators and FFS (full flight simulator) Level D flight dynamics software. The SME is looking for integrator companies to sign subcontracting agreements.

[A French SME offers smart connected port solutions and seeks distribution service and subcontracting agreements](#)

Update: 2020-04-23 - Deadline: 2021-04-24

A French start-up company offers a smart application to sea and river marinas captains' offices for the digital operational management of their dockside places. It provides its customers with easy-to-use global solutions combining sensors integrated in housings, management and maintenance software. The SME is seeking distribution service agreements with industrials and subcontracting agreements with marinas in Spain, Italy, Greece and the Netherlands.

[A French SME producing high pressure resistant optronic system is looking for commercial intermediary service in Scandinavia](#)

Update: 2020-04-23 - Deadline: 2021-04-24

A French SME proposes optronic solutions for exploration of extreme environments as the depths of the oceans or the atmosphere. The company manufactures optical and photographic equipment resistant to extreme temperatures (-30°C/+400°C), to high pressures (100 bars), vibrations and shocks. Combining optronics, mechatronics and digital processing by software, it provides its clients with easy-to-use tools. The SME is looking for commercial agency or distribution service agreements in Scandinavia.

[Breathing air supply systems for vehicles in polluted areas – seeking distribution partners in the Netherlands, Italy, France, Czech Republic, Hungary and Denmark](#)

Update: 2020-04-23 - Deadline: 2021-04-24

A German company provides innovative small, light and powerful breathing air supply systems for vehicles in polluted areas. The systems are easily integrated in the vehicles. They guarantee safety for the driver and fulfill all legal requirements. The company is looking for distribution partners in the Netherlands, Italy, France, Czech Republic, Hungary and Denmark.

[North-Eastern Romanian company provider of services in electrical installation seeks interested partners for an infusion of capital based on a financial, acquisition or joint venture agreement](#)

Update: 2020-04-21 - Deadline: 2021-04-22

Romanian company, located in the North-Eastern part of Romania, providing consultancy services, design, assembly and equipment for electrical installations, with an experienced team of professionals both in commercial and industrial activities, is looking for partners ready to make an infusion of capital based on a financial, acquisition or joint venture agreement.
