Oportunidades de cooperación tecnológica: Búsquedas de Socios

[H2020-EIC-FTI-2018-2020 - Companies interested in a high efficiency fermentation technology demonstration are sought by an Italian biotech&engineering company](#)

Update: 2020-06-23 - Deadline: 2020-09-30

An Italian biotech&engineering company specializing in fermentation systems and scale-up for biotech production, has developed a new fermentation bioreactor and technology allowing a large number of biotech products manufacturing. To carry out the prototype demonstration and complete and qualify the technology, the company is looking for producers and/or users of fermentation plants/processes working in the food, feed, pharma sectors, interested in research cooperation within a FTI project.

Oportunidades de cooperación tecnológica: Demandas

[Start-ups sought: Solutions for a measuring system to determine angles in lashing and lifting devices](#)

Update: 2020-06-18 - Deadline: 2020-08-18

A world leading German manufacturer of chain systems and supplies for mining and industry is looking for a measuring system solution to determine angles in lashing and lifting devices. As this technology request refers to an innovation challenge for start-ups published on an open innovation platform only start-up companies are sought to collaborate within technical cooperation agreements..

[A French SME is looking for organic acids from bioprocess](#)

Update: 2020-06-17 - Deadline: 2021-06-18

An innovative French SME is developing and producing environmental friendly products like de-icing salts, weed-killers or active substances for gardens and agriculture. The production of these compositions uses organic acids now produced in the chemical industry from non-renewable

sources. The SME is looking for organic acids produced from renewable sources like straw, wood,... through a biomass process. Partnership can be considered via manufacturing, technical, R&D agreement.

Oportunidades de cooperación tecnológica: Ofertas

[An established Slovak research institute has developed cheap and stable polymer nanocomposite with antibacterial properties for medical applications, clean pharmaceutical and food industry, households and others and is looking for licensees or investors](#)

Update: 2020-06-19 - Deadline: 2021-06-20

An established Slovak research institute has developed polymer nanocomposite with antibacterial properties. The novel hybrid nanomaterial is composed of hydrophobic carbon quantum dots (hCQD) mixed with a polymer of choice (e.g polyamide, acrylics, butadiene, dialkylphthalate, dimethylsiloxanes, isoprene, etc.) in processes allowing manufacturing of different forms - coating, flexible film, foil, fiber and sheet. The research institute is looking for licensees or investor.

[Test and develop agricultural technology prototypes in a test bed region in cooperation with local and national research and business partners](#)

Update: 2020-06-18 - Deadline: 2021-06-19

A Swiss organisation for economic promotion offers a platform to provide companies with the possibility to test and develop their innovation and technology in smart farming on real farms. This enables companies to develop their technology faster than testing in lab conditions and supports the acceptability of end users through joint tests. The Swiss organisation is looking for smart farming companies for research cooperation agreements.

Oportunidades de cooperación empresarial: Demandas

[Georgian company is looking for a pet food supplier](#)

Update: 2020-06-16 - Deadline: 2021-06-17

Company is located in the capital of Georgia. They are one of the main distributors of pet foods in Georgia and are working with more than 25 pet-shops all over the country. They are looking for a partner who produces pet food. They want to sign a supplier agreement with a European company who could supply them with pet (cat and dog) food under the "Genetically Modified Organism" Free regulation.

Oportunidades de cooperación empresarial: Ofertas

[Russian manufacturer of molecular biology products is looking for foreign partners under distribution services agreements](#)

Update: 2020-06-16 - Deadline: 2021-06-17

A Russian research company specializes in the sphere of molecular biology and offers a wide range of biotechnological products for research activities (deoxyribonucleic acid markers, kits and mixes). The company is looking for partners in the EU countries to conclude a distribution services agreements.

[Russian supplier of organic food is looking for partners in foreign countries for cooperation via distribution services agreement](#)

Update: 2020-06-16 - Deadline: 2021-06-17

Russian trading company specializes in export to foreign countries of environmentally friendly and healthy food products like natural honey, natural plant oil, natural juices, nectars, fruit drinks, natural kvass of natural fermentation, chocolate, candy, wafers, biscuits, natural porridges, including with fruit and berries. The products do not contain artificial additives and GMOs. The company is looking for partners to cooperate under a distribution services agreement.

[A Russian manufacturer of enameled wire is looking for foreign distributors](#)

Update: 2020-06-16 - Deadline: 2021-06-17

A Russian company is engaged in the production of enameled and winding wires. These wires have a special insulating material, which is made of electrically insulating varnish. The company is looking for foreign partners to conclude distribution services agreements.

[Russian rice producer is looking for foreign distributors](#)

Update: 2020-06-16 - Deadline: 2021-06-17

A Russian company grows and produces a Rapan variety of rice, which is used to prepare many dishes and even desserts. The company is looking for reliable partners from foreign countries to conclude a distribution services agreement.

[Russian seller of healthy food products is looking for foreign distributors](#)

Update: 2020-06-18 - Deadline: 2021-06-19

A Russian company that sells healthy food products (cereals, flour, butter, honey, herbs) that do not contain additives, preservatives or GMOs. The company is looking for partners to conclude a distribution services agreement.

[French specialist manufacturer of frozen high-quality pastries is looking for distribution agreements outside its national market](#)

Update: 2020-06-18 - Deadline: 2021-06-19

The South French company produces artisan style frozen pastries. To carry out its mission of supplying restaurant professionals as well as bakeries and supermarkets, the company set up in 2009 their R&D department with a dozen professionals to find the most innovative product formulation. In order to maintain growth, the company is now looking for distribution agreements abroad in EU and Asia.

[An Israeli company that has developed an IoT based container monitoring device is looking for distributors.](#)

Update: 2020-06-17 - Deadline: 2021-06-18

This Israeli company has developed an IoT based container level monitoring device that serves as an end unit within a cloud monitoring solution. The system generates real time data, reports and alerts. It can be used in order to optimise waste collection routes, fertilisers refill routes (in agriculture) or food refill routes (animal farming). By optimising the routes, the system saves costs. The company is seeking to expand its international activity and is therefore seeking distributors.

[Dutch manufacturer of biotech packaging materials made of the roots of mushrooms and agricultural waste offers its manufacturing services](#)

Update: 2020-06-17 - Deadline: 2021-06-18

A Dutch biotech company specialized in the production of biobased packaging made from mycelium (the roots of mushrooms) and agricultural waste, is looking for partners abroad. The Dutch company is offering a manufacturing agreement.

[Bulgarian producer of accessory for greenhouses is looking for distributors](#)

Update: 2020-06-18 - Deadline: 2021-06-19

Producer from Bulgaria specialized in tomato roller hooks, an accessory for greenhouses, is interested in entering new markets worldwide through establishing distribution service agreements. Currently the company distributes the product on the local market and in South Korea.
