### Oportunidades de cooperación tecnológica: Búsquedas de Socios

[EUROSTARS – Spanish SME looking for a partner to carry out preclinical regulatory trials for the development of novel antitumorals based on nanomedicine.](#)

*Update: 2020-06-29 - Deadline: 2020-07-20*

A Spanish SME, in collaboration with a local University, has been developing an advanced drug delivery system which allows to increase the therapeutic efficacy of chemotherapeutics against Non-Small Cell Lung Cancer (NSCLC). The goal of this Eurostars proposal is to obtain a full-characterized antitumoral product ready to be tested in clinical trials. They are looking for a partner to carry out the preclinical regulatory trials.

[H2020-MSCA-IF-EF-SE: Transcriptomic and metabolomic expert scientist \(PhD\) or researcher with several years of experience in omics discipline related to fermentation process](#)

*Update: 2020-06-26 - Deadline: 2020-07-30*

An Italian company with high experience in production and purification of API (Active Pharmaceutical Ingredient) develops a fermentation process to produce a proprietary small molecule. An experienced researcher with transcriptomics and metabolomics know how is sought within Society & Enterprise Panel of Individual Fellowships of Marie- Sklodowska-Curie Actions. He/she should contribute to further optimize the production process as well as enhance the knowledge of microbial biochemical pathways.

[H2020-EIC-FTI-2018-2020 - Companies interested in a high efficiency fermentation technology demonstration are sought by an Italian biotech&engineering company.](#)

*Update: 2020-06-23 - Deadline: 2020-09-30*

An Italian biotech&engineering company specializing in fermentation systems and scale-up for biotech production, has developed a new fermentation bioreactor and technology allowing a large number of biotech products manufacturing. To carry out the prototype demonstration and complete and qualify the technology, the company is looking for producers and/or users of fermentation plants/processes working in the food, feed, pharma sectors, interested in research cooperation within a FTI project.

## Oportunidades de cooperación tecnológica: Demandas

[Dutch SME is looking for Belgian and German partners in the fruit/vegetable industry to validate their new device to assess the shelf life quality and contaminants in fruits and vegetables](#)

*Update: 2020-06-29 - Deadline: 2021-06-30*

The SME is located in the Netherlands and develops a portable mass spectrometer that allows food companies, government authorities and regulatory bodies to screen produce such as fruits and vegetables for shelf life and contaminants (like pesticides, antibiotics, pathogens ) real time, independent of location and time. The Dutch SME is looking for Belgian and German Partners to validate their apparatus. The cooperation type proposed is a technical agreement.

[A Brussels-based, UN-founded association looking for social enterprises for social field work and capacity enhancing](#)

*Update: 2020-06-30 - Deadline: 2021-07-01*

A Brussels-based international NGO is looking for partners with technological capabilities to apply their advocacy and academic knowledge in field situations. These cooperations in hardware, software and technical and human expertise will enable the NGO and its partners to provide better field services to its members and beneficiaries, most of whom are women from disadvantaged backgrounds. Partners are being sought for a services agreement or a commercial agreement with technical assistance.

## Oportunidades de cooperación tecnológica: Ofertas

[Stimulator of growth for bio vegetables, fruit, vine and other crops](#)

*Update: 2020-06-26 - Deadline: 2021-06-27*

A Czech family run SME has developed a high quality organic stimulator of growth for bio vegetables, fruit, vine and other crops which is applied on soil and on the leaves of plants based on extracts from vermicompost. The SME is looking for growers of organic vegetables, fruit and vine interested in testing the product on specific plants and later exploiting that via closing a commercial agreement with technical assistance.

[Technology for processing fallen leaves into paper](#)

*Update: 2020-06-29 - Deadline: 2021-06-30*

A Ukrainian research and production company which developed a technology for production of pulp and paper made of fallen leaves is looking for partners to establish joint venture agreement or companies who wish to use this technology under a license agreement.

[Established Slovak university in cooperation with a Slovak scientific and research institute have developed a new method of production of recombinant hyperthermostable catalase-peroxidase and are looking for a licensee](#)

*Update: 2020-06-24 - Deadline: 2021-06-25*

The innovative method of production of recombinant hyperthermostable catalase-peroxidase AfKatG from *Archaeoglobus fulgidus* (with the ability to catalyse efficient degradation of hydrogen peroxide in various conditions, including extremely high temperatures) was developed by a team of inventors from an established Slovak university and an established Slovak scientific and research institute. The preferred cooperation type is license agreement.

[Single plasmid systems for balanced inducible protein production and gene regulation in lactic acid bacterium \*Lactococcus lactis\*](#)

*Update: 2020-06-26 - Deadline: 2021-06-27*

A Slovenian research organization has developed a new series of plasmids for advanced genetic modification of lactic acid bacterium *Lactococcus lactis*. The method is useful in the dairy industry as a cell factory and as a host for recombinant protein expression. Partners are sought in industry and academia in biotechnology for technical and research cooperation agreements.

[Myocardial patch technology for cardiac regeneration](#)

*Update: 2020-06-30 - Deadline: 2021-07-01*

Two Italian Universities have jointly developed and patented a new technology consisting of a polymeric scaffold capable of mediating cardiac regeneration and protecting from reperfusion injury using cardioprotective agents that can be loaded on the biomatrix. They are looking for technical cooperation agreement with a company to develop the patch further in order to bring it to the market, in addition to an organization for pre-clinical validation model. Investors are also sought.

[Bulgarian company offers new technology for production of energy and extraction of mineral resources from seawater for co-development and market adaptation through Joint venture agreement](#)

*Update: 2020-06-26 - Deadline: 2021-06-27*

Bulgarian micro company offers patented innovation technology for the extraction of Brown's gas /oxyhydrogen/ and minerals rich in ferrous, non-ferrous and rare metals from sea/ waste water. The proposed method is displacing all deep-water technologies for extraction of minerals from sediments and nodules from the bottom of the world's oceans. It can also be used for water waste management. Joint venture agreement for the market adaptation of this innovation and co-development is sought.

[Smart needle that converts conventional syringes into 100% biosafety syringes.](#)

*Update: 2020-06-30 - Deadline: 2021-07-01*

The company was created in 2017 in Spain, with the aim of carrying out the development of a novel patented technology that breaks into the incipient market of international health safety. Their innovation is a unique retractable needle system that can be assembled to any syringe of the market, whose mechanism is activated fully automatically only few seconds after its single use, making it a 100% safe syringe. The company is looking for a commercial, license or manufacturing agreement.

## Oportunidades de cooperación empresarial: Demandas

## Oportunidades de cooperación empresarial: Ofertas

[An Irish company specialising in sustainability have developed a chemical free moss prevention product seek partners for distribution channels](#)

*Update: 2020-06-26 - Deadline: 2021-06-27*

The Irish SME have been pioneers in developing chemical and plastic free products for the horticulture and forestry sector for a number of years. The company have formulated a chemical free product for preventing moss and 'green staining' on hard surfaces that is extremely effective and safe for the environment. The knowledge-based company and the founders' engineering backgrounds formulate products from natural origins and sustainable sources are seeking distribution agreements.

[Russian producer of feed waste processing product is looking for distributors](#)

*Update: 2020-06-24 - Deadline: 2021-06-25*

A Russian company is engaged in the production of a biological product for processing keratin-containing waste into feed protein, which is used in the agricultural industry. The company is looking for reliable partners to conclude a distribution service agreement.

[Albanian food processing company seeks distributors.](#)

*Update: 2020-06-24 - Deadline: 2021-06-25*

A company based in Tirana producing traditional Albanian spreads and preserved vegetables is looking for distributors who will help them place their products on international markets, more precisely Bulgaria, Greece, Romania, Switzerland, and Sweden.

[Distributors sought for German fishing line threading aid made from pollutant-free materials](#)

*Update: 2020-06-26 - Deadline: 2021-06-26*

For their fishing line threading aid that ensures a quick and uncomplicated threading of the fishing line, a German company seeks partners for distribution services agreements. The aid is made from pollutant-free materials and can be used for all types of fishing rods equipped with line rings. Specialised in the development, manufacture and sale of innovative products to save time and optimise profits, the German company offers products made from high-quality materials.

[COVID-19: Finnish diagnostic SME offers their absorbance plate reader for sales partners](#)

*Update: 2020-06-23 - Deadline: 2021-06-24*

A Finnish company offers their compact, versatile, multimode absorbance plate readers for the diagnostic area. The company, which already has substantial international sales, has developed plate readers and detector components for both research and IVD (In Vitro Diagnostics) use. In line with company's growth strategy, it is now looking for sales partners i.e. OEM (own equipment manufacturers) partners or distributors under the company's or distributor's own brand.

[UK company specialising in a range of quality organic and vegan friendly craft beers seeks distributors worldwide](#)

*Update: 2020-06-25 - Deadline: 2021-06-26*

A well-established UK brewery is offering a range of unique organic and vegan friendly craft and traditional beers including pale ales, bitters, stouts, porters and wheat beers, which are available in various sizes of bottles and one-way kegs. In order to help increase its overseas market presence, the company is seeking experienced distributors in the drinks sector worldwide.

[Bulgarian supplier / exporter of essential oils, absolutes, concretes, floral waters, botanical extracts and dried medicinal herbs seeks manufacturing agreements](#)

*Update: 2020-06-24 - Deadline: 2021-06-25*

A Bulgarian company established in the heart of the Bulgarian Rose Valley, is a leading exporter of floral water, essential oils, dried medicinal herbs and botanical extracts, more than 20 kinds of essential oils and 10 kinds of floral water, the most famous of which is the Rose essential oil from Rosa Damascena. The company is looking for a manufacturing agreement by supplying different industries (cosmetics, pharmaceutical, food, etc.) with its products or finding partners for a joint venture.

[Bulgarian boutique organic honey offered for distribution.](#)

*Update: 2020-06-29 - Deadline: 2021-06-30*

Bulgarian farmer is producing organic boutique honey and is looking for partners abroad who are willing to sell, distribute and promote its products under distribution services agreement.

[A Polish company specialized in coffee roasting and high-quality coffee is looking for distributors](#)

*Update: 2020-06-23 - Deadline: 2021-06-24*

The Polish company specialized in coffee roasting is offering high-quality, fresh-roasted and very rare coffee from own plantation in Papua New Guinea. The company wants to expand its activity abroad more and offers the final product - coffee, as well as coffee roasting and packaging solutions according to customer needs. The producer seeks to find business partners to work under a distribution services agreement.
