Oportunidades de cooperación tecnológica: Búsquedas de Socios

[Eurostars: Swiss SME is seeking partner with experience in the field of medical devices, digital diagnostics, health software / app development, complimentary products for a fatigue digital diagnostics development project.](#)

Update: 2020-07-08 - Deadline: 2020-08-07

Monitoring levels of fatigue is an unmet clinical need. Current use of questionnaires is subjective and difficult to implement. A Swiss SME seeks to implement its digital diagnostic tools in health care either through its own digital platform or together with other health related platforms (preferably with a mobile module). To apply for Eurostars the SME is seeking partners with expertise in medical technology, digital diagnostics, health software / apps development for research cooperation.

Oportunidades de cooperación tecnológica: Demandas

[Spanish technology center looks for biodegradable expandable beads suppliers for biodegradable expanded foams to be used in the industry of packaging.](#)

Update: 2020-07-08 - Deadline: 2021-07-09

A Spanish technology research centre specialised in plastics, composites, polymer blends, and polymer materials for packaging is looking for novel commercial biobased and biodegradable polymers. The technology centre is looking for bio-based alternatives to adapt to current expanded polystyrene packaging under commercial agreement with technical assistance. If they do not find the commercial solution they consider a future development under research or technical cooperation agreement.

Oportunidades de cooperación tecnológica: Ofertas

[Novel luminescent probes of lanthanide complexes for sensing of biomolecules](#)

Update: 2020-07-08 - Deadline: 2021-07-04

A research institution and a university from Spain have developed a new family of antenna chromophores able to sensitize effectively luminescence of lanthanides to be applied as labelling probes for biomolecules. Industrial partners specialized in probes for biological research are being sought for patent licensing and/or research collaboration.

[Nanostructures for energy and biomedical applications](#)

Update: 2020-07-06 - Deadline: 2021-07-07

A research group from Spain working on physical chemistry has developed nanotechnology solutions applied to different fields, including photovoltaic devices and biomedical applications, achieving enhanced performance and superior flexibility in the design. They are interested in collaborating with public and private companies with expertise in the nanotechnology field under license, financial and research cooperation agreement.

[Assessing the degree of authenticity of natural flavourings](#)

Update: 2020-07-06 - Deadline: 2021-07-07

The Slovenian public research organization has developed a new system for authenticity assessment of natural flavourings. This system is based on the analysis of specific compounds and their stable carbon isotope composition. The measurement data are analysed by machine-learning algorithms to characterise the authenticity of natural vs. artificial flavourings. Partners are sought among food and aroma industry for technical and research cooperation agreements.

[Portuguese SME offers its technology of pressure monitoring through pressure sensors. Commercial agreement with technical assistance is offered.](#)

Update: 2020-07-08 - Deadline: 2021-07-09

Portuguese SME specialized in the rehabilitation and physiotherapy areas through design and development of medical devices and other fields such as robotics, wearable devices, and biomedical products is looking for manufacturers of medical devices. The SME intends to offer its technology of pressure monitoring through pressure sensors under cooperation through commercial agreement with technical assistance.

Oportunidades de cooperación empresarial: Demandas

Oportunidades de cooperación empresarial: Ofertas

[French CRO \(contract research organisation\) offers full range of custom services to develop and produce antibodies, immunoassays and bioassays: new manufacturing, outsourcing or subcontracting agreements sought in biotech, pharma, healthcare, cosmetics](#)

Update: 2020-07-07 - Deadline: 2021-07-08

A French company as a center of excellence in monoclonal antibody research and immunoassay kit development is offering its strong expertise and know-how for custom product development and custom services to companies, research organisations or universities in the field of biotechnology, diagnostics, healthcare, cosmetics, pharmacology. The company seeks

manufacturing, outsourcing and/or subcontracting agreements with companies willing to develop their own specific kits, tests or vaccines.

[A Lithuanian company active in trade is looking for non-sterile medical creped paper distribution partners](#)

Update: 2020-07-02 - Deadline: 2021-07-03

The Lithuanian company has exclusive distribution rights of non-sterile medical creped paper and is looking for business partners to work under the distribution services agreement.

[Russian producer of natural berry jelly and drinks is looking for distributors](#)

Update: 2020-07-07 - Deadline: 2021-07-08

A Russian company is engaged in the production of natural, instant, vitamin-enriched kissels, drinks that are produced without the addition of chemicals and dyes. The company is looking for reliable foreign partners from the food industry to conclude a distribution services agreement.

[A Ukrainian producer of wood pellets is looking for distribution services and commercial agency agreement](#)

Update: 2020-07-02 - Deadline: 2021-07-03

The Ukrainian company from north part of country specialized in production of wood pellets wants to conclude distribution services and commercial agency agreements with trade partners all over the world to promote and sell its products on new local markets.

[French producer of milk replacers for young animals feeding is looking for distributors abroad](#)

Update: 2020-07-07 - Deadline: 2021-07-08

A French company is specialised in the production of milk powders for young animal feeding (calves, piglets, lambs and kids).
