Oportunidades de cooperación tecnológica: Búsquedas de Socios

[\[Eureka/Eurostars\] Dutch SME is seeking partner for development of non thermal plasma \(NTP\) air cleaning reactor with focus on removal of polycyclic aromatic hydrocarbons in the petrochemical industry for research cooperation](#)

Update: 2020-07-02 - Deadline: 2020-07-30

A Dutch company is looking to further develop its non thermal plasma (NTP) technology that has proven to greatly reduce the polycyclic aromatic hydrocarbons (PAC) emissions from the petrochemical industry. The company wants to submit a Eurostars proposal and is looking for research cooperation with a cleantech and petrochemical company focusing on development of the technology and its integration in the production processes.

Oportunidades de cooperación tecnológica: Demandas

[Water and/or air filter cartridges to be used for environmental pollutants removing](#)

Update: 2020-07-01 - Deadline: 2021-07-02

An Italian innovative startup patented some hybrid materials for the absorption of environmental pollutants and also for the biodegradation induction of hydrocarbon pollutants spilled into the sea. The company is looking for suppliers of air and/or fresh/salted water filters, to be filled with these innovative absorbent materials, and so only the empty filter cartridges are needed. A commercial agreement with technical assistance will be proposed to suppliers of air and/or water filters.

Oportunidades de cooperación tecnológica: Ofertas

[A German provider of blockchain based business solutions offers its expertise in secure data exchange to find business partners for a joint venture agreement, a research cooperation agreement or a technical cooperation agreement](#)

Update: 2020-07-07 - Deadline: 2021-07-08

A German provider of services and products in the field of supply chain digitisation and secure cross-company data exchange offers its broad skills and knowledge to apply for research or technical proposals for a joint venture agreement, a research cooperation agreement or a technical cooperation agreement.

[Novel air-conditioning hose system for aircraft cabin maintenance](#)

Update: 2020-07-02 - Deadline: 2021-07-03

A Singapore institute of higher learning offers a novel hose system for air-conditioning that has a complete industry-applicable setup for aircraft cabin repair and maintenance. The technology improves the hose efficiency in terms of pressure loss and reduces the rise in temperature from inlet to outlet. It offers an efficient field-applicable setup that can be used in the aircraft Maintenance, Repair and Overhaul (MRO) industry. The institute seeks to license this technology to MNEs/SMEs.

[Cyberphysical system \(hardware and software\) for water efficiency in different customers and sectors](#)

Update: 2020-07-02 - Deadline: 2021-07-03

A Spanish SME, active in industrial engineering and IT, has developed a cyberphysical system (hardware and software) for water efficiency and consumption in different customers and sectors. The main purpose of this modular technology is to carry water from the water heater to the tap where it will be used, without wasting a single drop in the process. They seek financial agreements, commercial agreements with technical assistance and technology partners/prescribers for technical cooperation.

Oportunidades de cooperación empresarial: Demandas

[Spanish industrial engineer is looking for partners offering energy efficiency solutions applicable to different industrial sectors for a commercial agency or distribution agreement.](#)

Update: 2020-07-07 - Deadline: 2021-07-08

Spanish industrial engineer based in Barcelona is looking for innovative solutions that offer a measurable advantage in terms of energy efficiency or in general with UN Sustainable Development Goals (SGD). The solutions can be applicable to water / industrial / energy sectors. He is interested in a commercial agency agreement or a distribution agreement.

Oportunidades de cooperación empresarial: Ofertas

[A Spanish SME developer of a new system to transform regular chlorinated swimming pools into naturally depurated ones, seeks international partners for its distribution](#)

Update: 2020-07-08 - Deadline: 2021-07-09

A Spanish SME specialized in the sustainability field has designed and developed a new system for natural swimming water depuration. The product is totally adaptable to any pool dimension, and the biological filter is based on living aquatic plants, so it does not need any them <http://ical>

product for water purifying. The company is searching for international partners to distribute or commercialize its product under a commercial or distribution agreement. License agreements are also possible.

[Spanish gas detection systems manufacturer is looking for agents and distributors.](#)

Update: 2020-07-07 - Deadline: 2021-07-08

Spanish company that designs and manufactures detection systems for carbon monoxide and other toxic and explosive gases is looking for agents and distributors to promote its products and services among integrators and installers that operate in the field of industrial installation and civil construction, especially underground car parks and road tunnels.

[French start-up is looking for distributors for its portable and easy-to-use water analyser to detect dangerous metals](#)

Update: 2020-07-08 - Deadline: 2021-07-09

The French start-up is developing new products based on a disruptive technology : microfluidic sensors allowing electrochemical detection. The company has designed and produced a first commercial version of a water analyser, portable, easy-to-use, able to detect very small amounts of dangerous metals, such as arsenic and lead. The company is looking for distributors in Europe.
