## Boletín de Oportunidades de Cooperación: Bioeconomía - 11/9/2020

### Oportunidades de cooperación tecnológica: Búsquedas de Socios

#### Oportunidades de cooperación tecnológica: Demandas

##### [Co-development of applications for smart farming using 5G connections](#)

*Update: 2020-09-03 - Deadline: 2021-09-04*

A Dutch telecom company with a 5G network for SME customers is interested in co-development and supporting new smart farming applications with the use of 5G technology. The company is looking for open innovation cooperation in offering solutions. Companies specialised in sensing/IoT, data engineering, artificial intelligence, augmented reality/mixed reality, visual inspection or robotics are sought for a technical cooperation agreement or a commercial agreement with technical assistance.

#### Oportunidades de cooperación tecnológica: Ofertas

##### [Device and method for automatic preparation of seed samples, in particular for plant phenotyping \(assessment of complex plant traits\).](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

Czech university has developed a novel high throughput device and method designed for the field of indoor plant cultivation systems. The seed samples are particularly suitable for plant phenotyping as the technology offers precise handling (even very small seeds - Arabidopsis thaliana) - which is otherwise manually demanding; detection of the gripped seed, liquid handling etc. There is a possibility to handle other small objects. Partner should be interested in licensing this technology.

##### [Collaboration on the development of fermented probiotic beverages offered by a Czech research institute](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

A Czech research institute specialised in malting and brewing offers collaboration on the development of fermented probiotic beverages. The institute is now seeking partners for research cooperation agreement.

[Proportional solenoid valve respirator for better assistance in patient ventilation](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

A Macedonian company is offering a prototype of a respirator with an improved air pressure control and flow based on the proportional assist ventilation (PAV). The prototype testing verified that the proportional solenoid valve control coupled with an incorporated Ambu bag and powered by compressed air propulsion is adequate for achieving improved adjustment to the patients' breathing patterns. Medical device manufacturers are sought for technical cooperation agreements.

[Late additive injection - A new technique for improving pellet production](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

A group of Swedish researchers presents a patented technology for introducing additives (e.g. steam, water or temperature-sensitive nutrients) in feed and fuel pelleting processes in an less energy-consuming way than current solutions. They are now offering this technology for acquisition, licensing or commercial agreement with technical assistance to an industrial partner willing to bring the solution to the market.

[Autonomous device providing accessibility to aquatic environments of people with impaired mobility](#)

*Update: 2020-09-03 - Deadline: 2021-09-04*

A Greek engineering SME has developed and patented a device for the safe and autonomous access of people with disabilities to aquatic environments. It is easy to use, requiring no assistance for embarkation and disembarkation of the person who uses it. It can be installed in aquatic environments with different profiles and removed without creating damages to the surrounding environment. The company is looking for partners to establish commercial agreements with technical assistance.

[A Swiss deep-tech spin-off developing a novel malaria diagnostic technology seeks scientific and business collaborations to further develop and commercialise their technology.](#)

*Update: 2020-09-10 - Deadline: 2021-09-11*

A Swiss university spin-off has developed a novel malaria diagnostic test that is based on a patented and published amplification of a pan-malarial biomarker using a chemical method. It enables faster, more sensitive and less expensive diagnostic tests as it aims at detecting asymptomatic carriers in countries where Plasmodium vivax malaria parasites are dominant. To further develop the technology a company or university is sought for technology and research cooperation or financial agreement.

[Minimally invasive sensor for detection and control of tissue ischemia](#)

*Update: 2020-09-10 - Deadline: 2021-09-11*

A Spanish biomedical research networking center has developed a new disposable and miniaturized array of electrochemical sensors for the minimally invasive monitoring of tissue ischemia. They are looking forward to establishing license, research cooperation, or joint venture agreements.

[License agreements are sought for a novel medical technology which repairs upper respiratory tract tissues and sterilizes biological cells.](#)

*Update: 2020-09-02 - Deadline: 2021-09-03*

The novel biomedical technology developed by a Turkish engineering company offers license agreements for the treatment of upper respiratory tract associated diseases including Coronaviruses and Acute Respiratory Syndromes. The technology uses endoscopic procedures to biologically sterilize the upper tract and repair damaged tissues within the trachea through cold plasma therapy. License agreements are sought.

[Custom-made formulations of polyherbal nutraceuticals in various delivery formats](#)

*Update: 2020-09-03 - Deadline: 2021-09-04*

A Singapore SME has developed a database of clinically useful herbs and functional herbal blends designed for targeted health benefits, using specific ratios of herbs for effective outcomes. The SME seeks to partner food and nutritional supplements SMEs in R&D, licensing or manufacturing agreements for the supply of ingredients. The partner is sought from Germany or a EUREKA country with bi-lateral funding arrangements with Singapore.

[COVID 19: Emergency Lung Ventilator](#)

*Update: 2020-09-04 - Deadline: 2021-09-05*

Latvian engineers and medical experts has developed a non-expensive, automated lung ventilator used during COVID-19 pandemic. It is designed to be assembled from easily available components. Team is close to finalizing product development and looking for manufacturing partners interested in production of device. Certification of ventilator as a medical device is needed as well. They are open for commercial agreement with technical assistance, licencing and technical cooperation agreement.

[Spanish company with a disinfection technology for food and baby products is looking for partners for its industrialization and commercialization.](#)

*Update: 2020-09-08 - Deadline: 2021-09-09*

A Spanish company in the electromedical sector has created a prototype for the disinfection of small food items, especially suitable for the disinfection of breastfeeding equipment, but equally effective for the disinfectant treatment of fresh plant foods prior to consumption. The company is looking for a partner in charge of the industrialization and commercialization of the product, for its manufacture and launch to the market.

[Industrial production of magnetite micro- and nanoparticles : a magnetic iron oxide for a large range of applications](#)

*Update: 2020-09-03 - Deadline: 2021-09-04*

A French start-up specialized in recycling ferrous by-products has designed a new process for the industrial production of magnetite. By producing it through the recycling of ferrous wastes,

they enable a high volume and low cost production of those materials and unblocks the development of new applications such as wastewater treatment or soil remediation. Partnership can be considered via commercial agreement with technical assistance, technical cooperation or joint venture agreement.

## Oportunidades de cooperación empresarial: Demandas

[Denmark based biomass company is looking for suppliers of residual products to the biogas sector](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

The Danish client is a privately owned company with an extensive and long-lasting experience in the utilisation of industrial by-products. In addition the company focuses on the development of new solutions for utilisation of by-products. The company wants to develop the biogas segment of the business and is therefore looking for partners that can supply by-products containing carbon and/or protein (e.g. alcohol, sugar, fat, meat, fermentation residues etc).

[Romanian coffee company seeks suppliers of green coffee to cooperate under distribution services agreement.](#)

*Update: 2020-09-01 - Deadline: 2021-09-02*

The Romanian company specialized in processing green coffee is looking for new suppliers. The company is looking to establish long-term partnerships under the distribution services agreement.

## Oportunidades de cooperación empresarial: Ofertas

[Traditional Albanian wine producer is looking for distributors in Europe](#)

*Update: 2020-09-07 - Deadline: 2021-09-08*

An Albanian company specialized in the production of wine with local variety of grapes is offering its traditional wine to importers under a distribution services agreement in order to export to new markets.

[French contract research organisation providing high added value R&D services in development and production of monoclonal antibodies, recombinant proteins, DNA plasmids, genetic & cell engineering : manufacturing / subcontracting agreements sought](#)

*Update: 2020-09-01 - Deadline: 2021-09-02*

The French CRO (contract research organisation) offers high value custom services for the development, engineering and production of antibodies, recombinant proteins, plasmids & vectors, cells, immunoassays & bioassays. New manufacturing and subcontracting agreements are sought with companies or universities or research institutions working in biotechnology, diagnostics, healthcare, cosmetics, pharmacology willing to develop new tests or kits.

[Mobile X-ray units – Innovative Swedish med-tech company looking for distributors in Germany.](#)

*Update: 2020-09-08 - Deadline: 2021-09-09*

A Swedish med-tech company has developed an innovative mobile X-ray unit, the smallest, lightest and most mobile unit on the market. Their revolutionary battery allows the X-ray unit to operate 24/7, whilst offering premium image quality – allowing for true x-ray mobility. They are now looking for distributors with connections to public or private hospitals or other caregivers in Germany.

[Romanian company having as profile general mechanics operations, machining and metal fabrications, with extensive experience in CNC processing, is looking to expand its distribution across Europe](#)

*Update: 2020-09-10 - Deadline: 2021-09-11*

The company was established in 2004 in the largest city from north-west region of Romania. The Romanian company's activity mainly aims at programming/adjusting machine tools with numerical adjustment, as well as designing parts and devices. In order to consolidate its presence at international level, the company is looking for partners interested in distribution its products based on a distribution services agreement.

[A Spanish canned fish producer from Galicia seeks for distribution and commercial agent agreements in the Euro zone](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

A Spanish company based in Galicia, in the fish and seafood sector, is in search of distributors and agents to commercialize its canned fish and seafood products in the Euro zone. The SME produces a wide variety of products and formats distributed through 2 channels: the HORECA channel, for professional's distribution; and supermarkets and food stores for public's consumption. Its origin and their 31 years of experience in the field guarantees a medium-high quality of the final product.

[German SME specialized in data management for precision farming is looking for subcontracting agreements](#)

*Update: 2020-09-04 - Deadline: 2021-09-05*

A German SME has developed a GIS-based (geographic information systems) economic and environmental feedback and report system for precision farming and is looking for farmers and companies in the agricultural sector interested in a subcontracting agreement.

[Portuguese exporter of Azorean fresh fish and distributor of deep frozen food products is looking for trade intermediaries](#)

*Update: 2020-09-08 - Deadline: 2021-09-09*

Portuguese (Azorean) company specialized in exporting Azorean fresh fish and distributing deep frozen food products is looking for distributors in EU and non-EU countries.

[Romanian gourmet coffee company seeks distributors in Europe to cooperate under distribution services agreement](#)

*Update: 2020-09-03 - Deadline: 2021-09-04*

A Romanian company is seeking to develop sales on international markets by finding business partners interested in distributing its products under distribution agreements. The company is offering a wide range of fresh roasted coffee and coffee blends from all over the world.

[Slovenian developer of innovative tool for safe, simple and fast transfer of cryovials is looking for partners under distribution and license agreements](#)

*Update: 2020-09-08 - Deadline: 2021-09-09*

Slovenian company has developed innovative tool for a simple transfer of cryovials with biological material. A pen-shaped aluminium tool protects the user from direct contact with the cryovial and prevents frostbites, while increased accuracy and speed of the process lessen possibilities of damaging the biological material during the transfer. Partners are being sought for distribution and/or license agreement for supplying the tool to companies, laboratories and research organizations.

[A Dutch eco-friendly company is looking for distributors and agents for their innovative plastic-free straws.](#)

*Update: 2020-09-09 - Deadline: 2021-09-10*

A Dutch eco-friendly company manufactures plastic-free straws. The wheat straws can be regarded as a sustainable alternative for plastic straws, which have a dramatic effect on our environment. Since from 2021, the use of disposable plastic will be banned in the EU, the company is looking for commercial partners to increase sales. A commercial agency agreement or a distribution services agreement is envisioned.
