[Experts sought for medical data annotation of potentially malign lesions for the development of a computer-aided prostate magnetic resonance imaging \(MRI\) analysis software](#)

Update: 2021-02-26 - Deadline: 2021-03-29

An e-health company based in North Germany is developing a software for computer-assisted prostate magnetic resonance imaging analysis (MRI). The solution is based on deep learning algorithms and aims at supporting the healthcare industry via an AI platform. Currently the SME is looking for services agreements with medical data annotation experts who identify and mark the potentially malign lesions in a set of anonymized training cases.

[Looking for solution to upgrade biogas into biomethane CH4 95% and carbon dioxyde CO2](#)

Update: 2021-03-08 - Deadline: 2022-03-09

A French SME has specialised in micro anaerobic digestion for farmers exploitations and small agrofood plants. The company is urgently seeking a partner with proven and reliable solution to separate bioCH4 and CO2 during the production process of biogas in small installations with flow rates from 5 up to 30 Nm3/h. A private company or an academic partner is sought for a commercial agreement with technical assistance, a technical cooperation agreement or a licence agreement.

[Dutch company active in food-ingredients is looking for innovative fermentation technologies to upgrade agricultural waste/side streams into functional and/or nutritional ingredients for the baking industry.](#)

Update: 2021-02-26 - Deadline: 2022-02-27

A Dutch subsidiary of a British corporation active in food-ingredients for the baking industry is looking for partners with innovative ideas or innovative processes to co-create or co-develop

fermentation technologies to upgrade agricultural waste/side streams into functional and/or nutritional ingredients within the frame of a license agreement, a research cooperation agreement or a technical cooperation agreement. This request refers to a challenge published on an internet-platform.

Oportunidades de cooperación tecnológica: Ofertas

[A Korean R&D institute is looking for global partners for automated point-of-care device technology for cardiovascular disease under technical cooperation and research cooperation](#)

Update: 2021-02-24 - Deadline: 2022-02-25

A Korean R&D institute specialised in ICT bio-healthcare has developed an automated biomarker analysis technology, enabling to diagnose cardiovascular disease in the early stage. The technology is more reliable than existing strip-type diagnostic kit and enables diagnostic devices to be miniaturised compared to conventional devices. Any organisation in need of such a technology can be a partner under technical cooperation and research cooperation agreement.

[A Ukrainian Institute offers production of medical bandages for wounds treatment made of radiation crosslinked hydrogels](#)

Update: 2021-03-04 - Deadline: 2022-03-05

A Ukrainian Institute offers production of medical bandages for wounds treatment made of radiation cross-linked hydrogels. A bandage is a modern way to provide emergency aid for burns, bleeding and open pneumothorax. The material of bandage is keeping the water, allowing the diffusion of solutions, but not transmitting the bacteria. An Institute is looking for long-term business and production partners under commercial agreement with technical assistance and technical agreement.

[Active hemoglobin with highest ability to transport oxygen for application in laboratory reagents \(cell culture\), cosmetics, medical devices, wound healing and pharmaceuticals](#)

Update: 2021-03-09 - Deadline: 2022-03-10

An Austrian SME is developing a novel hemoglobin complex for use in various in-vitro & in-vivo application areas. This complex is characterized by a high oxygen carrying capacity, purity, safety and functionality. The developers are looking for partners who need specific oxygen carriers or want to adopt the technology in their manufacturing environment -technical cooperation, commercial or license agreement are sought.

[Biomarker validation for improving diagnosis of rheumatoid arthritis offered under a cooperation and licensing agreement](#)

Update: 2021-02-24 - Deadline: 2022-02-25

An Austrian research team specialized in autoantibody biomarker development and rheumatoid arthritis (RA) has defined a panel of autoantigens for improving early RA diagnostics and therapy response - prediction and/or monitoring. A complete pipeline for further validation of biomarkers and a large cohort of well-defined clinical samples are available. The research team seeks partners to commercialize biomarkers by a technical cooperation and licensing agreement or financial investment.

[A young German SME is looking for partners for the technological development and international commercialisation of their digital AI-based counting solution for animal farming](#)

Update: 2021-02-26 - Deadline: 2022-02-27

The German SME is specialised in developing innovative solutions for the digitalisation of animal farming processes. They developed an embedded system which detects, tracks and counts objects in a transparent way. Currently, the technology is used in the livestock sector to count large groups of pigs during the selling and rehousing process. However, the technology can also be applied to different animals and objects. The SME is looking for technological and commercial partnerships.

[Portable self-cooling bottle](#)

Update: 2021-02-26 - Deadline: 2022-02-27

Nothing cools like a cold drink on a hot day, but access to refrigeration is sometimes tricky in outdoor settings such as camping or in parts of the world that lack adequate refrigeration. A Singapore institute of higher learning has developed a portable self-cooling bottle with an integrated thermal battery that cools the liquid inside only when the consumer wants. Licensing or technical cooperation for further co-development is sought, particularly with bottled water manufacturers.

[Activated small interfering RNA \(siRNA\) microneedles for pathological scar treatment](#)

Update: 2021-02-22 - Deadline: 2022-02-23

A Singapore institute of higher learning has developed a world-first clinically effective and pain-free treatment of pathological scars using topical small interfering RNA (siRNA) microneedles. This patented technology comprises of a dissolvable microneedle containing activated siRNA for scar treatment. The team is currently working towards clinical trials. The technology provider is interested in licensing or commercial partnerships with technical assistance with MNEs/SMEs.

[Molecular Surface Engineering \(MSE\) for life science research and multiplex diagnostics](#)

Update: 2021-03-01 - Deadline: 2022-03-02

A German nanotechnology company is offering modification of surfaces using Molecular Surface Engineering (MSE) for multiplex diagnostics and life science research. They are looking for partners that are interested in applying these technologies in the framework of a research cooperation or a manufacturing agreement.

[Quantum chemical computing for modelling and prediction of reaction parameters as well as energetic, mechanical, optical or electronic target properties of highly complex molecular systems and solid-state materials - service for SMEs](#)

Update: 2021-03-04 - Deadline: 2022-03-05

A German company is providing computing power and software algorithms at quantum chemical scale for effective computing and prediction of properties as well as reaction parameters of highly complex molecular systems and solid-state materials. Technical cooperation or commercial agreements with technical assistance are offered especially to small and medium companies in the chemical, pharma, lacquer, adhesive, solvent or polymer sector without own high power chemical computing facilities.

[Production of devices and materials at micro and nano scale](#)

Update: 2021-02-26 - Deadline: 2022-02-27

A company in North-Eastern Italy provides products in the fields of life sciences, micro-optics and anti-counterfeiting. The company comes from a long experience in fabrication of devices and micro and nanostructured material using well established techniques from semiconductor industry. They developed a disruptive proprietary technology based on nanoimprinting lithography obtaining products with high throughput, high resolution and innovative effects. They look for manufacturing agreements.

[Adaptive toasting device to the type of bread](#)

Update: 2021-03-01 - Deadline: 2022-03-02

A research group from a Spanish university has developed an adaptive roasting device. The device changes according to the type of food and it consists of an artificial vision perception system composed of an insulating glass window, a wide-angle lens, a low-cost color sensor camera and a homogeneous illumination system, itself consisting of insulating glass and an illumination system. They are looking for license or manufacturing agreements.

[A Lithuanian R&D company, specializing in the development of medical equipment, sensors, and robotics solutions is offering cooperation under the technical cooperation agreement](#)

Update: 2021-03-08 - Deadline: 2022-02-27

The R&D (research and technology) development company from Lithuania is working in the development of medical devices and diagnostics, sensoric systems, robotics solutions. The company is offering its services under the technical cooperation agreement.

Oportunidades de cooperación empresarial: Demandas

[Russian producer of dietary supplements is looking for suppliers of cucumaria](#)

Update: 2021-03-05 - Deadline: 2022-03-06

A Russian manufacturer from the Vladivostok region is engaged in the production of biologically active supplements made of trepang, squid, sea hedgehog. It is looking for a supplier of cucumaria-sea cucumber under supplier agreement.

[Danish non-toxic pheromone pest control invention seeks manufacturer in EU](#)

Update: 2021-02-24 - Deadline: 2022-02-25

A Danish company has developed a novel fermentation-based solution for producing insect pheromones, which can be used for pest control in agriculture. The company is looking for a cooperation partner in the EU with existing large-scale fermentation capacity to establish production, especially for the fermentation step under a manufacturing agreement.

[A French wholesaler of eco-friendly disposable tableware and sustainable products is looking for manufacturing agreement in Europe.](#)

Update: 2021-03-01 - Deadline: 2022-03-02

The French SME distributes a large range of disposable tableware like cups, plates, bags, cutlery, take-away boxes. The products are 100% eco-friendly and biodegradable and/or compostable. The company is looking to source new products, or find new manufacturers to start partnership. The company is looking for partners under a manufacturing agreement. Partners from EU countries, UK, Mediterranean Basin are preferably sought.

[Polish engineering company is looking for manufacturing partners in Germany, Austria or Switzerland to develop a prototype of agricultural machine](#)

Update: 2021-03-02 - Deadline: 2022-03-03

Polish engineering company, based near capital city Warsaw, specialized in machine design with the use of CAD engineering software, has developed a new type of agricultural machine and now is looking for an experienced production partner from Germany, Austria or Switzerland, to develop the prototype of the product. The company is offering cooperation in the form of joint venture or manufacturing.

[A Turkish company specialized in hydraulic components such as actuators, power packs, testing systems in the maritime and industrial sector, seeks shipbuilding equipment manufacturers under distribution services agreement](#)

Update: 2021-03-05 - Deadline: 2022-03-06

A Turkish company is active in the installation of a broad range of hydraulic components for yachts or industrial applications. Additionally, the company provides technical support with their experienced team and seeks shipbuilding equipment manufacturers under a distribution services agreement.

Oportunidades de cooperación empresarial: Ofertas

[Italian food and wine producers seek distributors for zero alcohol wine on Asian markets](#)

Update: 2021-03-08 - Deadline: 2022-03-09

A group of Italian food and wine producers produces wine, spirits, craft beer, zero alcohol wine, extra virgin olive oil, and vinegar. They are looking for distributors in Japan, Singapore, South Korea and Thailand, for their products, particularly their zero alcohol wine.

[Korean manufacturer of water purifiers and water softeners seeks distributors or agents](#)

Update: 2021-02-23 - Deadline: 2022-02-24

This Korean company's water purifier and softener use an eco-friendly CDI (Capacitive De-Ionization) technology to control mineral levels in water. This company is the first to commercialize the CDI technology in Korea, of which only 10 other companies in the world possess. Thanks to the technology, its items are energy and cost efficient with high recovery rate. It hopes to make commercial agency, distribution services, manufacturing or outsourcing agreements with potential global partners.

[Russian producer of diagnostic test systems is looking for distributors](#)

Update: 2021-02-22 - Deadline: 2022-02-23

The Russian company from the science city of Koltsovo (Novosibirsk region), engaged in the production of diagnostic test systems (sets of reagents for enzyme immunoassay for a number of infections), is interested in finding a potential partner for the conclusion of distribution services agreement.

[Russian developer of a medical exoskeleton is looking for a licensee](#)

Update: 2021-02-26 - Deadline: 2022-02-27

A Russian company has developed an innovative medical exoskeleton to maintain an upright posture and improve patient mobility and self-care. For medical institutions, hospitals, rehabilitation centers - a 5 year exclusive license is offered for the exoskeleton production technology know-how. The company is looking for reliable partners to conclude a license agreement.

[Russian producer of feed additives for agriculture is looking for distributors](#)

Update: 2021-02-26 - Deadline: 2022-02-27

A Russian company from the Novosibirsk region specializing in the production of biologically active feed additives for farm animals and birds on the basis of lactic acid bacteria, minerals, micro-algae and vegetable filling (without the use of antibiotics and genetically-modified organisms), is looking for partners for distribution services agreement.

[Russian manufacturer of fried sunflower seeds is looking for distributors](#)

Update: 2021-03-05 - Deadline: 2022-03-06

A Russian company from the Republic of Mordovia is engaged in the production of fried sunflower seeds. The company is looking for reliable partners to conclude a long-term distribution services agreement.

[Russian producer of dietary supplements is looking for distributors](#)

Update: 2021-03-10 - Deadline: 2022-03-11

The Russian company specializing in deep processing of blood and antlers of Altai marals and production of medicines and dietary supplements from the blood of marals for improvement of health is looking for partners under the distribution services agreement.

[Ukrainian company, specializing in production of equipment for the production, preparation and packaging of fuel briquettes / pellets, is looking for distributors in foreign markets](#)

Update: 2021-03-03 - Deadline: 2022-03-04

The Ukrainian company specializes in equipment for the production, preparation and packaging of fuel briquettes / pellets. The company also provides installation services and training to work on this type of equipment, as well as delivery of finished products with the process of declaring goods at customs. The company is interested to find a long-term partnership with distributors or partners for joint venture in order to open a joint production in EU market.

[Albanian producer of virgin and extra virgin olive oil seeks distributors](#)

Update: 2021-02-26 - Deadline: 2022-02-27

An Albanian producer of olive oil sector is looking for distributors in France, Germany and Italy. The company processes only organically grown olives from an Albanian region and produces virgin and extra virgin olive oil.

[Chilean refill/reuse platform for products is looking for partners for license agreements or franchising in the Netherlands, Germany, UK and France to implement its reusable packaging distribution system](#)

Update: 2021-02-26 - Deadline: 2022-02-27

The Chilean company develops and offers IoT connected dispensers and smart reusable packaging for home care, personal care, beverages and food. They eliminate packaging waste while providing maximized cost savings and convenience. Their system provides game-changing product traceability and deep business intelligence for retailers. They are looking for partners in France, the Netherlands, UK and Germany for license agreements or franchising to implement their reusable system.

[Spanish gourmet almonds producer seeks distributors for their products in European countries.](#)

Update: 2021-03-04 - Deadline: 2022-03-05

A Spanish company (from Mallorca) specialized in the production of almonds offers a wide range of almond products made with no additional additives. They produce high quality products where their crops are raised respecting the environment and the biodiversity. The company seeks gourmet distributors or commercial agents to commercialise its products in Europe.

[Company based in the Netherlands with a distillery in the Dutch Caribbean specialized in award winning rum, is looking for distributors in Europe.](#)

Update: 2021-02-22 - Deadline: 2022-02-23

The Dutch SME has been producing rum and other related liquors in their distillery since 2009. The company is looking for distributors in Europe and is willing to offer a distribution services agreement.

[An Italian company who invented an antimicrobial and antiviral substance \(European patent\) for use in medical devices seeks wholesalers worldwide](#)

Update: 2021-03-08 - Deadline: 2022-03-09

The Italian company, with the use of a patented colloidal silver formulation, has created medical devices, masks, mask spray, nasal spray and throat spray, for use in the current pandemic situation. This company is looking for a great opportunity to represent its medical devices in the global marketplace and would like to make partnerships with wholesalers under distribution services agreements.

[Belgian SME offers innovative LED lighting for industrial poultry barns under distribution services agreement](#)

Update: 2021-03-01 - Deadline: 2022-03-02

A tech company from Leuven in Belgium specialises in advanced poultry lighting. The company is scaling up its distribution channels in five EU countries (Germany, France, Spain, Italy and Poland) for the intelligent LED lighting range for intensive (industrial) poultry farms. It calls out for

service-oriented distributors and agrotechnical integrators specialised in high-quality poultry equipment in order to establish tailor made distribution contracts with competitive margins.

[Irish high quality food industry packaging company is looking for commercial agency agreements in the Benelux and surrounding EU countries, with a focus on agencies with a knowledge of the meat and dairy industry.](#)

Update: 2021-03-03 - Deadline: 2022-03-04

Irish company offering high-quality packaging solutions for the food industry. Specialising in packing for fresh products including dairy, and meats. Specialist in BoneGuard and BoneGuard V for meat and aluminium butter wrap. This company is looking for commercial agency agreements in Benelux and surrounding EU countries.

[German engineering office is looking for distribution, manufacturing or license agreement for a skill toy and lifestyle-accessory](#)

Update: 2021-03-02 - Deadline: 2022-03-03

A German engineering office has developed a legally protected skill toy and lifestyle accessory. A steel disc moves along a profiled ring that is interrupted by small balls and with skilful movements the user can hold the disc in 'endless' movement. The toy can be used e.g. as pendant on a band or just can be put into a pocket. It could also be a promotion article for e.g. EU-institutions or replace the 'fidget spinner'. The SME is looking for a distribution, license or manufacturing agreement.

[A leading Turkish manufacturer of anatomy and simulation education models is looking for a distribution services agreement](#)

Update: 2021-02-26 - Deadline: 2022-02-27

The Turkish company, which has been founded in Kayseri/Turkey in 1998, produces and sells human and zoology anatomy models, which include 300 anatomy and 200 simulation models. The company has ISO 9001-2015, ISO 1002, and CE certificates. They would like to sell their products directly to health-related institutions or companies in foreign countries. They offer a distribution services agreement.

[Distributors sought for french ice vending machines](#)

Update: 2021-03-01 - Deadline: 2022-03-02

A French company that developed an innovative machine that produces and distributes ice cubes is looking for distributors in Europe. This innovative kiosk for outdoor installation offers ice cubes every time with impeccable quality.
