[Sustainable antifouling technology for in ship seawater systems sought by Dutch Navy](#)

Update: 2021-03-19 - Deadline: 2022-03-20

The Dutch Navy uses seawater aboard in cooling and fire fighting systems. The organisms in seawater cause fouling inside these systems. To remove the fouling frequent maintenance is necessary. That's why the Navy is looking for innovative technologies to reduce the fouling. They aim to set up an experiment within the framework of a commercial agreement with technical assistance or a technical cooperation agreement. This profile refers to an open innovation platform.

Oportunidades de cooperación tecnológica: Ofertas

[COVID-19: Portable medical device for the fast detection of infectious diseases](#)

Update: 2021-03-20 - Deadline: 2022-03-21

A Greek start-up company offers an inexpensive and precise molecular diagnostics medical device that can be used by trained professionals for the detection of COVID19 and other infectious diseases (i.e. influenza, HIV). The company is looking for specialized partners, active in the field of medical instruments and with access to hospitals, clinics and diagnostic centers, also for end users such as airports, large touristic facilities etc. Commercial cooperation with technical assistance sought.

[Ukrainian company offers innovative system for growing cannabis, plants clones and seedlings under commercial agreement with technical assistance or under joint venture agreement](#)

A Ukrainian company has developed technology and equipment allowing to reduce the time of plant growth by 36% and to increase the yield by 20%. The heart of the system is the rotary drum that manipulates the effect of gravity on the crops to stimulate the release of the plants' natural growth hormone. The system is fully automated and consumes less power. The company is looking for commercial agreement with technical assistance or joint venture agreement.

[Extraction of vanillin from lignin or ferulic acid by oxidation with hydrogen peroxide](#)

Update: 2021-03-18 - Deadline: 2022-03-19

Slovenian researchers developed and patented the process of converting of lignin and ferulic acid into vanillin using hydrogen peroxide as an oxidant and vanadium oxide as a catalyst. The new innovative process is greener and more cost effective. The innovative technology, can be used in food, cosmetic and pharmaceutical industry. Researchers are looking for spruce wood processing companies to sign license and/or research cooperation agreement in EU and beyond.

[COVID-19: Rapid surface test for the detection of SARS-CoV-2](#)

Update: 2021-03-12 - Deadline: 2022-03-13

A Greek biotech SME company offers a rapid test for the detection of SARS-CoV-2 in common surfaces such as metal, plastic, glass, paper and stainless steel. The rapid surface test is a valuable tool for several sectors enabling the companies to monitor and mitigate the spread of COVID-19 in their facilities. The Greek company is looking for commercial agreements with companies or end-users in fields such as healthcare, food industry, hospitality and public organizations etc.

[Innovative device for air purification and humidification with decorative properties.](#)

Update: 2021-03-12 - Deadline: 2022-03-13

A Latvian company has developed an indoor air purification technology that also humidifies the air and has decorative properties. The company is looking for partners who would be interested in this device for commercial agreements with technical assistance. The company is also interested in research cooperation agreements with entities interested in further development of the device to be tested and analysed under specific projects and research calls.

[Layered substrate and use in biosensors](#)

Update: 2021-03-17 - Deadline: 2022-03-18

A Spanish biomedical research networking center has developed a new layered substrate that allows the in situ detection or quantification of one or more analytes in real time, looking to establish license, research cooperation, or joint venture agreements.

[Serbian company 3D printing illuminated signs, casings, covers, biocompatible elements and objects made by advanced materials looking for manufacturing or research cooperation](#)

Update: 2021-03-15 - Deadline: 2022-03-16

Serbian SME, active in 3d printing, reverse engineering and rapid prototyping, has developed a procedure to print illuminated signs, casings, covers, and objects. The company can print 3D objects for different end-users by its own equipment, enabling the rapid creation of a prototype, testing, and production of small series. The company is looking for partnerships under manufacturing or research cooperation agreement.

[Optimised aquatic feed with okara byproduct](#)

Update: 2021-03-22 - Deadline: 2022-03-23

A Singapore institute of higher learning has developed a cost-effective formulation to include okara in feed for abalone. More than 30,000 kg of okara is generated from soya milk and tofu production in Singapore alone and discarded as waste. The formulation can potentially be adapted and customised for other aquatic species. The technology provider is interested in licensing or commercial partnerships with technical assistance with MNEs/SMEs of all sizes.

[Electropulse induced microinjection into living biological cells](#)

Update: 2021-03-12 - Deadline: 2022-03-13

A German university offers a new method to microinject substances into a cell. This microinjection method facilitates the penetration of the capillary into the cell and prevents clogging. This new method saves time and material and it is less prone to errors. Partners from the area of life science are sought for license agreements.

[A French company developing technology for potentiation of therapeutic antibodies seeks partners from immunotherapy market who want to increase therapeutic performances of their antibodies](#)

Update: 2021-03-19 - Deadline: 2022-03-20

A French biotech company has a proprietary technology allowing the potentiation of exogenous therapeutic proteins (enzymes or antibodies). The goal is to develop new engineered antibodies together with European companies allowing a higher capacity to degrade pathogenic antigens. This technology concerns many immunotherapies in inflammatory and immune diseases, cancers or rare diseases. The company would like to achieve technical cooperation, research or license agreement.

[Innovative drug delivery system for photosensitizers in photodynamic therapy](#)

Update: 2021-03-18 - Deadline: 2022-03-19

A German university has improved the therapeutic approach of photodynamic therapy (PDT) used in the treatment of cancer patients. It uses biocompatible formulations in order to address the limitations of current PDT. The university offers a license and if requested a technical cooperation agreement.

[COVID-19: Medical testing labs sought to qualify and quantify a new mass testing system for Covid-19 using advanced laser techniques](#)

Update: 2021-03-11 - Deadline: 2022-03-12

A UK company is offering a mass testing system for Covid-19 using advanced laser techniques (Diffractive Phase Interferometry, DPI) on a drop of blood from the patient. The company is working with a UAE company and are seeking medical testing laboratories whose research is of viral infection control, to help qualify and quantify this testing method in the UK and Europe, via technical cooperation agreement.

Oportunidades de cooperación empresarial: Demandas

[Slovenian NGO seeks manufactures of innovative textiles suitable for patients with atopic dermatitis \(AD\)](#)

Update: 2021-03-22 - Deadline: 2022-03-23

The role of Slovenian non-government organization (NGO) for patients with atopic dermatitis is to provide patient support, raise awareness and raise the quality of life. Skin of patients with atopic dermatitis is extremely sensitive to anything irritating and clothing fabric has an important role in controlling AD symptoms and quality of patients lives. They are looking for manufactures of new innovative textiles that are safe to use and easy to maintain for patients.

[Greek commercial agent in enteral nutrition products and medical equipment seeks partners under commercial agency agreement](#)

Update: 2021-03-15 - Deadline: 2022-03-16

The Greek SME company represents and manages a portfolio of specialised clinical nutrition products and medical equipment that can be delivered at home patients. It is a leading company in the sector and is licensed by the Hellenic Medicines Agency. The company is looking for enteral nutrition products under commercial agency agreement with exclusivity rights.

Oportunidades de cooperación empresarial: Ofertas

[Greek functional foods and healthy snacks offered to distributors in Italy, Sweden and Germany](#)

Update: 2021-03-11 - Deadline: 2022-03-12

An innovative Greek company has developed a range of functional food products and healthy snacks which it wishes to offer to partners in Italy, Sweden and Germany for distribution agreements on their local markets.

[Macedonian production company of cherry peppers and honey peppers seeks distributors](#)

Update: 2021-03-15 - Deadline: 2022-03-16

A Macedonian company, leading in production of cherry peppers in various colours, packaging and recipes in the field of antipasti for stuffing, is looking for new partners to help them extend their business activities and place their products on European markets, based on distribution services agreements.

[Russian producer of dietary supplements is looking for distributors](#)

Update: 2021-03-10 - Deadline: 2022-03-11

The Russian company specializing in deep processing of blood and antlers of Altai marals and production of medicines and dietary supplements from the blood of marals for improvement of health is looking for partners under the distribution services agreement.

[Russian manufacturer of ice cream and frozen products is looking for distributors](#)

Update: 2021-03-12 - Deadline: 2022-03-13

A Russian company that specializes in the production of various types of ice cream made from natural ingredients and frozen raw food products is looking for reliable partners to conclude a distribution services agreement.

[Russian producer of veterinary products for animals is looking for distributors](#)

Update: 2021-03-19 - Deadline: 2022-03-20

A Russian company from Moscow develops and manufactures various grooming supplies such as shampoo, spray conditioner, medical balsams for dogs, cats, horses, rodents, birds. The company is looking for partners to conclude a distribution services agreement.

[Ukrainian company seeks an investor in order to construct thermal power plants on biological raw materials using new technologies under financial agreement](#)

Update: 2021-03-16 - Deadline: 2022-03-17

A Ukrainian company in the alternative energy field offers an opportunity for partnership in the construction and operation of a network of biofuel thermal power plants in Ukraine. The company seeks investors and partners to make a financial agreement or the joint venture agreement.

[A Dutch company with production facilities in India for organic jute & cotton bags is looking for supermarkets, big retailers and distributors for manufacturing agreements](#)

Update: 2021-03-22 - Deadline: 2022-03-23

A Dutch company with production facilities in India, is specialized in manufacturing of organic jute and cotton bags, all combined with Global Organic Textile Standard and Fair Trade certifications. The whole chain is open and transparent. The company looks for supermarkets, big retailers and distributors that want to produce hand-crafted and fully biodegradable bags. The Dutch company is interested in manufacturing agreements, but also in outsourcing, subcontracting or joint venture agreements.

[Russian manufacturer of mink fur skins is looking for distributors and production orders in Europe](#)

Update: 2021-03-12 - Deadline: 2022-03-13

A Russian company from Udmurtia has been breeding Scandinavian mink for more than 50 years (scanblack, scanbrown, white, silver-blue). The company is looking for partners from European countries to conclude distribution services or manufacturing agreements.

[A French manufacturer of spices and gourmet products is looking for new partners abroad under a distribution agreement](#)

Update: 2021-03-22 - Deadline: 2022-03-23

The French company is a manufacturer of authentic and delightful recipes, prepared from high quality ingredients, each one carefully selected (no preservatives, no artificial flavours), following traditional methods. The company is offering a range of more than 350 gourmet products such as jams, honeys and spices, emblematic of the French gastronomy, and is looking for long-term partners in Europe under a distribution agreement.

[A Sri Lankan manufacturer of ornamental and commercial plant varieties using plant tissue culture technology is looking for distributors and commercial agents](#)

Update: 2021-03-17 - Deadline: 2022-03-18

A Sri Lankan producer of ornamental and commercial plant varieties using plant tissue culture technology is looking for commercial agents and distributors around the world in order to expand its reach to overseas markets. The company produces ornamental plant varieties as well as plants like banana, pineapple, aloe vera for commercial cultivations.

[Polish company that produces specialized equipment for grain cleaning - aerodynamic separators - designed for agriculture and the food industry is looking for distributors and commercial agents.](#)

Update: 2021-03-22 - Deadline: 2022-03-23

A Polish company that produces machines for agriculture and forestry offers specialized equipment for cleaning grain for agriculture and food industry. The company has launched an innovative system for cleaning various materials in agriculture and the food industry (mainly grains, cereals, grasses, oil plants and legumes). The company is looking for distributors and commercial agents.

[Innovative Swedish company manufacturing plastic-free 100% circular cups seeks environmental oriented cafés and fast food companies for manufacturing agreement](#)

Update: 2021-03-19 - Deadline: 2022-03-20

This innovative small Swedish company is manufacturing disposable plastic-free cups for hot beverages. The certified core technology consists of proprietary process for production of its plastic free biomaterial and the unique coating technique for producing the cup fibre. The SME is entering the EU-market for establishing business, seeking environmental concerned cafés and fast-food companies with the interest to enter a manufacturing agreement.

[Polish company with extensive knowledge of creating cast iron products is looking for distributors](#)

Update: 2021-03-18 - Deadline: 2022-03-19

This family company from Poland has over 45 years of experience in manufacturing cast iron products. Their portfolio includes: lighting, urban architecture, home and garden products as well as balustrades. The firm proudly combines traditional craftsmanship with the latest technologies and is willing to sign agreements with distributors and agents or manufacturing agreements.

[UK manufacturer of high quality street furniture seeks distributors in Germany and France](#)

Update: 2021-03-12 - Deadline: 2022-03-13
