Boletín de Oportunidades de Cooperación: Bioeconomía - 12/4/2021

Oportunidades de cooperación tecnológica: Búsquedas de Socios

[A Turkish company seeks partners for a Eurostars R&D project of 3D-printed patient-specific implant production. Partner\(s\) should be specialized on pre-clinical research and the other one\(s\) be experienced on additive manufacturing](#)

Update: 2021-04-07 - Deadline: 2021-05-31

An innovative Turkish company located in Ankara and specialized in medical 3D printing focuses on custom made craniomaxillofacial (CMF) implant production with several properties such as a controlled (drug) release mechanism and biodegradability. As the coordinator, the company would like to construct a Eurostars project consortium in which the possible partners will be responsible for several tasks: 3D manufacturing activities with polymer + ceramic compositions and pre-clinical research.

Oportunidades de cooperación tecnológica: Demandas

[Italian start-up is looking for a partner with chemical expertise for optimizing the production and colouring process of tiles obtained from recycled organic materials](#)

Update: 2021-04-07 - Deadline: 2022-04-08

An Italian start-up specialized in the production of biodegradable furniture items obtained from organic waste materials is looking for a partner for developing sustainable tiles and improving their colouring process, under research cooperation agreement. The partner should have chemical expertise, and would analyse the waste materials used in the tiles' production and colouring process, to help solve the issues facing the currently developed tiles, such as their resistance problems to humidity.

[Italian company looking for collaboration in identifying industrial uses of vegetal waxes](#)

Update: 2021-04-01 - Deadline: 2022-04-02

An Italian SME specialized in coffee decaffeination is aiming to become a zero-waste company. While they can reuse or recycle every resource used during the process, the only waste they still produce are waxes extracted from the coffee beans. They are looking for technical collaborations in order to identify the possible uses of these vegetal waxes in other industries. They are also interested in research collaboration on circular economy and industrial symbiosis topics.

[Dutch company is looking for solutions to preserve steel in a more sustainable way](#)

Update: 2021-04-06 - Deadline: 2022-04-07

Large Dutch steel company wishes to make their current wet coating steel conservation sustainable and is looking for suppliers of complete systems to improve this process. Looking for commercial partners who can supply complete solutions with technical assistance, or technical cooperation partners that offer sustainable alternatives for preservation of steel structures with new preservation methods. This request refers to an innovation challenge published on an open internet platform.

Oportunidades de cooperación tecnológica: Ofertas

[Advanced electrospinning know-how for innovative medical devices development e.g. fibrous coverings for improved tissue regeneration, bioresorbable and non-bioresorbable polymers, vascular implants...](#)

Update: 2021-03-26 - Deadline: 2022-03-27

A French company develops research and manufacturing activities around electrospun materials. Electrospinning is an efficient technique to create polymeric fibers with diameters ranging from 100 nm to 10 µm. The produced porous scaffolds made of interconnected fibers are adapted to promote cell activity and thus bio-integration of medical implants. The company is looking for research, technical and manufacturing partnerships where electrospun materials lead to new advanced medical devices.

[A fraction of natural inhibitors of the inflammatory and thrombotic mediator Platelet-Activating-Factor, suitable for food supplement with anti-inflammatory, anti-thrombotic action is offered for commercial exploitation](#)

Update: 2021-03-31 - Deadline: 2022-04-01

A team of Greek university professors has developed an innovative method for obtaining a fraction that inhibits inflammation and thrombosis, caused by the potent mediator named Platelet-Activating Factor (PAF), made from by-products of the Mediterranean food industry. This fraction, which can be incorporated in food or taken as a supplement, is beneficial in combatting cardiovascular disease and other diseases. A license agreement or commercial agreement with technical assistance is sought.

[Anatomical models with unprecedented realistic functionalities for medical training, surgical planning and medical device development](#)

Update: 2021-03-24 - Deadline: 2022-03-25

An Austria-based R&D center in the field of medical technology offers customized, application-oriented anatomical models. These are designed to significantly reduce the number of cadaver tests needed in the development of medical devices and used as advanced solution for education of medical doctors. Also, 3D-printed, individual, patient-specific models are suited to

be used for training of complex surgeries. Research cooperations and commercial agreements with technical assistance are sought.

[Compact equipment for cost effective thermal treatment of wood](#)

Update: 2021-03-26 - Deadline: 2022-03-27

A Latvian R&D company has developed a technology/compact equipment for thermal treatment of wood. The equipment is fully functional and has been tested by pilot customers to prove its efficiency and economic advantages. The company is looking for partners who would be interested in commercial agreement with technical assistance or licensing to use, produce or further develop/adopt to local needs the technology/equipment.

[Warning system for early detection of water contamination, including automatic sampling and in real-time removal](#)

Update: 2021-04-07 - Deadline: 2022-04-08

A Swedish SME in applied research has developed a new cost-effective solution for early detection of water contaminants, including automatic sampling and in real-time removal. It detects and removes water contaminants like pathogens, pharmaceutical residues, and most of the micro-pollutants in drinking water and treated wastewater. The innovation is EU-ETV verified and recognised by the International Water Association (IWA). Partners are sought for joint venture and license agreements.

[An established Slovak research Institute in cooperation with a Slovak university has developed a new antimicrobial recombinant protein with lytic properties against pathogenic strains of Streptococcus agalactiae and is looking for licensees](#)

Update: 2021-03-24 - Deadline: 2022-03-25

A team of inventors from an established Slovak scientific and research institute and an established Slovak university has developed an innovative antimicrobial recombinant protein EN534-C with lytic properties against pathogenic strains of Streptococcus agalactiae. The protein EN534-C can be used mainly for the treatment, prevention or diagnosis of diseases caused by pathogenic bacteria Streptococcus agalactiae (GBS). The preferred cooperation type is license agreement.

[An established Slovak research institute in cooperation with a traditional Slovak university have developed a unique system for in vivo isolation of circulating tumour cells from peripheral blood and are looking for licensees or investors](#)

Update: 2021-03-24 - Deadline: 2022-03-25

An established Slovak scientific and research institute in cooperation with a traditional Slovak university have developed a unique system for in vivo isolation of circulating tumour cells from peripheral blood. Its advantage over existing solutions lies in the fact, that this system makes it possible to isolate more CTCs (or other cells present in peripheral blood) than other methods. The preferred cooperation types are license agreement or financial agreement.

[Database with food composition data on branded foods is offered for licensing](#)

Update: 2021-04-08 - Deadline: 2022-04-09

Slovenian public and private research organizations have developed a food composition database of food products available on the Slovenian and Eastern European market. The database is constantly updated and used in the national programme for food and physical activity for health to help end-users make informed decisions on consuming food products. The license to use the database is offered to partners in sports, fitness, nutrition organizers, food producers as well as research and academia.

[University spin-off offers cooperation on valorization of lignin-rich output streams to companies related to biorefinery, chemistry or pulp and paper industries](#)

Update: 2021-04-07 - Deadline: 2022-04-08

A Northern-German spin-off company offers technical cooperation agreements on valorization of lignin-rich biomass side streams or lignin intermediate output streams. Biorefineries, companies dedicated to renewable and sustainable chemistry and energy or pulp and paper industries can benefit from cooperation by receiving high-quality lignin and contacts for high-value applications.

[Italian start-up offers innovative products for soil fertility improvement](#)

Update: 2021-04-07 - Deadline: 2022-04-08

The company, based in northern Italy, is active in production of polymers whose aim is to enrich soils in agriculture with benefits in water retention & release, plants nutrition and crop yields. The company is currently seeking to establish a technical cooperation agreement and a research cooperation agreement with interested counterparts.

[UK SME with fully automated molecular diagnostic device looks for partners in the life science sector](#)

Update: 2021-04-07 - Deadline: 2022-04-08

Expert UK SME in the medical/healthcare sector offers innovative point-of-care (POC) technology to diagnose viral and bacterial infections within a fast and reliable process. The SME is looking to partner with a life science organisation, (R&D centre/academia/private for profit firm) to establish a research cooperation agreement in which the partner will provide specifications for test performance and the SME will develop the prototype. In the long-term, commercial exploitation is envisaged.

[Covid-19 salivary rapid and easy molecular test](#)

Update: 2021-03-30 - Deadline: 2022-03-31

A French company specialising in critical medical devices has developed a Covid-19 salivary rapid and easy molecular test in collaboration with a recognised research organisation. This saliva screening solution is CE-IVD (In-Vitro Diagnostic Devices Directive) marked and is for professional use only. The company is looking for new international partners through licence agreements or commercial agreements with technical assistance.

Oportunidades de cooperación empresarial: Demandas

[Japanese trading company supplying municipalities and local utility providers is looking for sustainable products and technologies to distribute](#)

Update: 2021-04-02 - Deadline: 2022-04-03

A Japanese trading company is looking for products and technologies in the sectors of power, water, and hazards management to be distributed to municipalities and local utility providers, for them to achieve sustainability goals. These could be technologies used in case of natural disasters and products used continuously for safety, reliability and environmental friendliness. The company wishes to engage in a commercial agency or distribution services agreement with relevant partners.

[German company is looking for weight plates made of tungsten \(wolfram\) under a manufacturing agreement](#)

Update: 2021-04-01 - Deadline: 2022-04-02

Small German start-up looks for middle to long-term manufacturing agreement for providing weight plates made of wolfram/tungsten, nickel and iron for long-term cooperation for newly developed and innovative sport product. The clients looks for a reliable partner who produces tungsten weight plates. For an initial trial 16 sample weight plates are needed according to the specifications in the attachment.

[French company is looking for a subcontractor of industrial oven cells for food industry.](#)

Update: 2021-04-07 - Deadline: 2022-04-08

A French company has specialised in the conception of automatic lines for industrial bakery. The company is looking for a manufacturing partner in order to produce ovens cells under French specifications. The partner should be specialised in welding and machining mechanics. A subcontracting agreement is sought for a long-term partnership.

Oportunidades de cooperación empresarial: Ofertas

[Swiss market leader for reusable packaging \(platform and product\) in the food takeaway industry seeks franchisees in the EU](#)

Update: 2021-03-23 - Deadline: 2022-03-24

A Swiss company offering a platform for reusable packaging in the food takeaway industry is expanding to European countries with a franchising model. The franchise partners will have exclusivity in their country and benefit from the extensive experience of the franchisor. At the same time, the proposed franchise model offers room for local adaptation of the system and the business model.

[Looking for overseas partners for its In Vitro Diagnostic \(IVD\) medical device that can diagnose diabetic kidney disease in less than 30 seconds with a small amount of blood \(6ul\) under distribution services agreements](#)

Update: 2021-04-07 - Deadline: 2022-04-08

Since 2003, the Korean company has been manufacturing In Vitro Diagnostic analyzers and test kits. The company developed the world's first disposable test kit to measure RBC(red blood cell) deformability, aggregation, and CSS(critical shear stress). Diabetes complications can be examined early, in 30 secs, with little blood. It helps to reduce the risk of serious symptoms and enable for a proper treatment. The company is looking for a business cooperation under distribution services agreement.

[Macedonian producer and trader of healthy food and beverages seeks distributors](#)

Update: 2021-03-26 - Deadline: 2022-03-27

A Macedonian food and beverage producer and seller specialized in specific dietary requirements, with experience in product development and food production since 1993, is looking for new international expansion opportunities. They are in search of distributors in order to establish long-term business relationships, and therefore offer their extensive portfolio of own-branded and custom-made products for trade and production.

[Producer and seller of wine from North Macedonia is looking for international business partners in grape production and hospitality to initiate a joint venture](#)

Update: 2021-03-23 - Deadline: 2022-03-24

A North Macedonian wine producer and seller, with a strong position on the domestic market, would like to take its innovative hospitality-driven strategy on the next level and start a wine cellar abroad as a joint venture with a partner that is well experienced and connected in the local grape farming and hospitality industry.

[A Macedonian manufacturer of mountainous mineral water is looking for business opportunities under commercial agency agreement or distribution services agreement.](#)

Update: 2021-04-08 - Deadline: 2022-04-09

A producer and seller of sparkling mountainous mineral water from Macedonia established in 1995, also focused on production of own-branded still water and beer, as well as licensed marketing of a couple of soft drinks is in search of companies to establish long-term business relationships with in order to reach out to a broader international market segments through commercial agency agreement or distribution services agreement.

[A Macedonian mill producing wheat flour and traditional baked products is looking for business opportunities under a distribution services agreement.](#)

Update: 2021-04-07 - Deadline: 2022-04-08

A producer and seller of wheat flour and wheat flour baked products from Macedonia established in 1992, is in search of partners to establish long-term business relationships with in order to increase its wheat flour sales and market share of baked goods sales via distribution services agreement.

[Macedonian company with its core business in production, distribution and sale of natural fruit juices, nectars, drinks and purees, is looking for international business partners through distribution services agreement or manufacturing agreement.](#)

Update: 2021-04-12 - Deadline: 2022-04-13

A Macedonian fruit juice producer committed to providing a wide range of products of high standard, maintained by excellent quality management is looking for beverage distributors and production companies in order to establish a long-term business cooperation through distribution services agreement or manufacturing agreement.

[Romanian producer of table sauces and spices is looking for distributors](#)

Update: 2021-03-24 - Deadline: 2022-03-25

Romanian producer of table sauces and spices for the food industry, restaurants, and catering units is looking for foreign importers, distributors, retailers, and catering companies to expand its business in Europe via distribution agreements. The company can also produce the sauces under private labels, offering, in this case, cooperation in terms of a manufacturing agreement.

[Russian producer of equipment for the food industry is looking for distributors](#)

Update: 2021-03-30 - Deadline: 2022-03-31

A Russian company, specialized in the development and manufacture of equipment for the food industry (vacuum presses, confectionery lines and ovens, food boilers, packaging equipment) is looking for trade representatives and distributors under distribution services agreements on the world markets for long-term cooperation.

[Russian producer of eco-friendly food products is looking for a distributors](#)

Update: 2021-03-24 - Deadline: 2022-03-25

A Russian company from the Tomsk region manufactures natural food products made of wild plants and berries (natural honey with berry juice, pine-cone jam, cedar nut oil, fir-needle oil, and others). The company is looking for trade partners under a distribution services agreement.

[Russian producer of plant-based raw materials for various industries is looking for distributors](#)

Update: 2021-03-25 - Deadline: 2022-03-26

A Russian company from Novosibirsk is specializing in the production of ingredients (oil, extracts, dried berries, etc.) from natural raw materials for different industries (including cosmetics, food, and pharmaceutical industries). The company is interested in finding partners for a distribution services agreement.

[Russian producer of wooden handles \(cuttings\) for tools is looking for reliable distributors](#)

Update: 2021-04-08 - Deadline: 2022-04-09

The Russian manufacturer from Nizhny Novgorod is engaged in the production of wooden handles (cuttings) from the highest varieties of deciduous trees. These cuttings are suitable for manufacturing for various tools (shovels, rakes, hammers, sapper blades, etc.). The company is looking for reliable partners to conclude long-term distribution services agreements.

[Ukrainian manufacturer of commercial refrigeration equipment is offering its products for distribution](#)

Update: 2021-04-06 - Deadline: 2022-04-07

The Ukrainian company is specialised in refrigeration equipment. It designs, manufactures and distributes a complete range of equipment for the food industry. The company is looking for distributors to expand its sales across the European markets under the frame of distribution services agreement.

[Ukrainian honey producer is interested in distribution service agreements](#)

Update: 2021-03-25 - Deadline: 2022-03-26

The Ukrainian company offers polyfloral and monofloral honey of the highest quality, collected in ecologically clean regions of Ukraine. The company's production is already well known in the local market and the manufacturer wants to enter new foreign markets. The company is interested to cooperate under distribution service agreements.

[The Ukrainian manufacturer of products for beauty and health is looking for partners under distributing service agreements](#)

Update: 2021-04-06 - Deadline: 2022-04-07

A Ukrainian manufacturer of cosmetics, medical products and dietary supplements, is open to cooperation with distributors and importers, pharmacies, specialty stores selling beauty and health products around the world. The company is committed to long-term, open and fruitful cooperation based on distribution services agreement.

[Ukrainian producer of microbiological multifunctional preparations for regulating nutrition and plant protection is looking for partners via distribution services agreements](#)

Update: 2021-04-08 - Deadline: 2022-04-09

A Ukrainian SME, a developer of innovative technologies for growing crops under agroclimatic stress, offers microbiological multifunctional preparations for regulating nutrition and ensuring plant protection against fungal and bacterial diseases. The preparations neutralize the negative influence of climatic stress factors and stimulate the growth and development of plants. The SME expects long-term cooperation with foreign partners via distribution services agreement.

[An Albanian company producing, gathering and packaging medicinal and aromatic plants is looking for distributors](#)

Update: 2021-03-31 - Deadline: 2022-04-01

An Albanian company which is specialized in producing, gathering and packaging of medicinal and aromatic plants is looking partners under distribution service agreement in Germany, France, Switzerland, Austria, and also other places like USA, China.

[Albanian farm gathering and packaging natural fresh fruit and vegetables and dairy is looking for distributors](#)

Update: 2021-03-29 - Deadline: 2022-03-30

An Albanian farm family company, specialized in the production of fruits, vegetables and dairy products, is looking for distributors in Greece, Austria, Croatia, Bulgaria, Kosovo, Montenegro, Bosnia Herzegovina, Serbia and North Macedonia.

[Spanish company seeks distributors for its innovative 3D light sheet microscopy](#)

Update: 2021-03-26 - Deadline: 2022-03-27

A Spanish company has developed a flat light beam fluorescence microscope (lightsheet) for viewing 3D images of biological samples. The solution allows observing the development of live three-dimensional organoids and organisms over a long time up to several days. The company is looking for distribution agreements.

[French laboratory specialised in bioengineering, regenerative medicine and biobanking offers subcontracting and outsourcing services](#)

Update: 2021-04-09 - Deadline: 2022-04-10

French laboratory specialised in human tissue is offering their services under subcontracting or outsourcing agreement. They want to offer their expertise in custom study design activities, contract research and testing solutions for the cosmetology and drug testing industries. They have a recognised expertise in the creation of protocols to produce in vitro human biological 2D & 3D models for cancer research and pharmaceutical development, enhancing the screening of drug candidates.

[Italian organic farm producing fresh organic pecorino cheeses is looking for distributors](#)

Update: 2021-03-23 - Deadline: 2022-03-24

An Italian company, certified organic, produces dairy products from sheep milk according to a process that takes place manually and follows the artisanal method with salting in brine. The company is interested in increasing its presence on the international markets through collaboration with potential partners to involve in a distribution services agreement.

[Czech start up company would like to find foreign distributors for its smart doors for hen house. Target countries: Poland, Austria, Germany.](#)

Update: 2021-03-30 - Deadline: 2022-03-31

A Czech start up company manufacturing and selling smart solution for small poultry breeders (B2C) is looking for distributors to enter markets based on distribution services. The company is ready to enter foreign markets. Main benefits are easy installation, reliability and saving of farmers' time – automatic operation.

[A French distributor and recycler of 0% plastic eco-designed packaging is searching for distributors or agents](#)

Update: 2021-04-11 - Deadline: 2022-04-12

A France-based company engaged in the eco-responsible packaging (0% plastic packaging) is looking for new partnerships under distribution services agreements or commercial agency agreements.

[German company offers biological fertilizer for use in organic farming and is looking for distribution partners](#)

Update: 2021-03-31 - Deadline: 2022-04-01

A German company, specialized in production of biological and multiple certified natural fertilizer, suitable for organic farming, agriculture, horticulture and hobby gardens, is looking for partners for a commercial agency or distribution services agreement worldwide.

[Slovak company engaged in the production of metal structures and their parts offers its services within the framework of subcontracting or manufacturing agreement](#)

Update: 2021-04-07 - Deadline: 2022-04-08

The company from Slovakia that manufactures metal structures and their parts is looking for partners in the mining, engineering, oil, energy and other industries. Services include material cutting, chip and shape machining, locksmith and welding work and finishing. The required type of partnership is subcontracting or manufacturing agreement.

[A Turkish company produces natural gel-like meat and chicken broth, dried meat and chicken, collagen-containing balm, and fruit juice is looking for a distribution service or manufacturing agreement](#)

Update: 2021-04-11 - Deadline: 2022-04-12

The Turkish company, which established in 2020 in Kayseri/Turkey, produces natural gel-like meat and chicken broth, dried meat and chicken, collagen-containing balm, and fruit juice. They also have an integrated meat plant for 68 years. They manufacture products from food to cosmetics in their newly established facility. To find new customers and markets, they are looking for a distribution service or manufacturing agreement.

[Distribution partner sought for Czech producer of paper napkins, towels, toilet paper and other daily-hygiene products](#)

Update: 2021-04-06 - Deadline: 2022-04-07

A Czech producer of paper hygiene products such as napkins, towels, toilet paper and other daily-hygienic products for both industrial and domestic use is looking for new partners based on a distribution services agreement.

[Swedish SME specialized in high precision automation solutions is looking for distributors and agents](#)

Update: 2021-04-12 - Deadline: 2022-04-13

The Swedish SME is a supplier of nanometer precision automation solutions for high precision microscopy, analysis equipment and production equipment. The SME provides a plug & play solution of high precision piezo stages as well as customized stages and customer specific solutions. The SME is looking for distributors and agents that have end customers in the life science and/or the semiconductor industry but also for manufacturers of equipment for those industries.

[An Israeli agricultural technology company that offers innovative plant growth management solutions is looking for partners under distribution services agreement](#)

Update: 2021-04-07 - Deadline: 2022-04-08

This is an Israeli, patent-registered, sustainable agricultural technology company, focused on root zone temperature optimization and irrigation by condensation. Their patent-listed product optimizes performance and reduces energy consumption, to bring maximum benefits to farmers. The company is looking for distributors of farming equipment or irrigation systems under distribution services agreement.

[Polish company specialized in import and export of stainless/acid resistant steel and production of semi-finished products and final products from these materials is looking for partners for distribution and manufacturing agreements](#)

Update: 2021-03-31 - Deadline: 2022-04-01

This Polish trading company, with almost 30 years of experience, is specialized in import and export of stainless/acid resistant steel. The company also produces semi-finished products and final products on individual order. The SME is looking for partners interested in manufacturing agreements and distribution services agreements.

[Innovative Czech patented heat treatment device for protection of honeybees against Varroa mites and organic honey production is looking for partners under distribution agreements.](#)

Update: 2021-03-30 - Deadline: 2022-03-31

A Czech manufacturer of unique facility which treats and protects bee colonies against Varroa mites via patented solution based on thermoterapeutic method utilizing the energy from the sun, for clean, ecological production of organic honey is looking for partners. The company is looking to enter new markets through partnerships under distribution agreements.

[A French manufacturer of agricultural central tire inflation system indicating the slippage rate is looking for distributors in the European Union](#)

Update: 2021-03-26 - Deadline: 2022-03-27

Thanks to an innovative process, a French company designed a central tire inflation system (CTIS) which fits wheeled agricultural machinery. The innovation consists in the slippage rate information that is communicated to the operator. The technology gives the possibility to inflate and deflate the machine's tires according to several parameters. The company seeks serious distributors willing to create a distribution partnership for this innovation.

[An Italian company offers vegan products obtained by processing local varieties of fruits, under distribution service and commercial agency agreements](#)

Update: 2021-03-26 - Deadline: 2022-03-27

A South Italy based certified organic farm seeks trade intermediaries for its vegan specialties obtained by processing local varieties of Hayward kiwi, navel oranges, red oranges, Valencia late oranges, clementines, mandarins and olives. The company offers compotes, nectars and fruit juices, extra virgin olive oil. The company has already experienced international trade. Cooperations will be carried out under distribution and commercial agency agreements.

[Romanian company producer of essential oils and various natural cosmetic products is looking for distributors and agents](#)

Update: 2021-03-25 - Deadline: 2022-03-26

The Romanian company is interested in expanding its market internationally by identifying international business partners interested in distributing its products under distribution services and commercial agency agreements. The company produces essential oils and natural cosmetic products.

[Spanish company of biostimulants and nutrients certified for organic farming is looking for distribution partners](#)

Update: 2021-03-25 - Deadline: 2022-03-26

A Spanish SME dedicated to the development of nutrients and biostimulants for agriculture is looking for partners to establish a long-term relationship in order to distribute their products in their country of origin. The companies products cover the needs of the plant in all phases of the

cultivation from rooting to harvest, increasing production and quality and a large part of them are certified for organic farming.

[A French company specialized in organic agricultural biofertilizers, coating and biostimulants is looking for distributors](#)

Update: 2021-03-26 - Deadline: 2022-03-27

A France-based company specialized in the production and distribution of organic agricultural inputs used as biofertilizers, coating solutions and biostimulants is searching for new partners under distribution services agreements or commercial agency agreement . It also realizes installations of bio-waste valorization systems using a new method of vermicomposting called continuous flow vermicomposting.

[Romanian manufacturer of soil conditioner and pest control products, made out of zeolite, is looking for distributors](#)

Update: 2021-03-31 - Deadline: 2022-04-01

A Romanian company specialised in the extraction and processing of zeolite minerals is looking for partners to distribute their products for agriculture: zeolite with foliar application, and soil conditioner. The products are 100% natural and eco-friendly, with proven results in the improvement of crops. The collaboration would be in the frame of a distribution agreement.
