[Austrian company is looking for partners for the creation of a novel collection box for electronic waste](#)

Update: 2021-04-12 - Deadline: 2021-06-28

As part of an open innovation challenge, the innovation unit of a big Austrian company is looking for technology partners to co-create a new recycling system for the decentralised collection of e-waste. Requested topics are the design of the e-waste box using new technologies that enable a first-class user experience with a digital interface (customer motivation) and streamlined operations (fill-level etc.). Commercial agreements with technical assistance or technical cooperations are proposed.

[ICT partner sought for managing information on transportation mobility in road networks](#)

Update: 2021-04-20 - Deadline: 2022-04-20

The Department for infrastructure and land development of the regional government of Biscay (Basque Country, north of Spain) has launched a challenge through an open-innovation platform: How can users of the road network make the most of the mobility information available gathered from road sensors' data which will result in positive impacts on the local economy and environment of the region? A commercial cooperation with technical assistance or a research cooperation shall address this issue.

[A French SME specialised in millimetric wave radar signal analysis is looking for technical cooperation agreements in order to process signals via Artificial Intelligence](#)

Update: 2021-04-20 - Deadline: 2022-04-21

The SME located in Southern France is specialised in contactless technologies. Based on millimeter wave research program, they created a radar to determine unique cardiac motions. Each cardiac motion represents a biometric signature for individual authentication. To improve signal analysis of millimetric waves radar, the SME is looking for Artificial Intelligence based processing methods. The SME would therefore be interested in technical cooperation agreements in the EU.

Oportunidades de cooperación tecnológica: Ofertas

[A Greek SME offers a forecasting system, providing sea characteristics and other support services, on high local resolution and looking for expanding it for commercial or joint venture or research agreements](#)

Update: 2021-04-12 - Deadline: 2022-04-13

A Greek SME dealing with IT solution for the environment offers a sea forecasting platform of high analysis, using satellite data. The platform is integrated, providing useful information for a multitude of end-users and it can cover any sea of the globe. The Greek company is looking for various partners, from various sectors for commercial or joint venture agreements or participation in research projects.

[COVID-19: Ukrainian company offering a device for air purification from pathogenic viruses and bacteria, including COVID-19, in crowded places, is looking for international partners](#)

Update: 2021-04-14 - Deadline: 2022-04-15

The Ukrainian company has created a device to clean the air from pathogenic viruses and bacteria, including COVID-19 in crowded places, premises and transport. Existing devices ionize the air, and this device electrifies the air and collects pathogenic viruses and bacteria on one of the electrodes. Companies interested in purchasing a prototype or serial production of this device for commercial operation under a license or production agreements are wanted.

[Decomposition of compound muscle action potentials in a noninvasive way](#)

Update: 2021-04-15 - Deadline: 2022-04-16

Slovenian researchers developed and patented an invention for achieving higher resolution while decoding brain-to-muscle signals. The invention performs the decomposition of compound muscle potentials into the contributions of individual motor units or their respective combinations. The advantage of the invention is that it noninvasive and improves understanding of motor system responses. Researchers are looking companies to sign license and/or research cooperation agreement in EU and beyond.

[Canadian SME offers expertise in image/pattern recognition and data science to link scores from a large database of consumer evaluated product ideas/concepts \(based on survey data\)](#)

Update: 2021-04-15 - Deadline: 2022-04-16

A Canadian consumer insights company has created an innovation platform designed to rapidly test new consumer products through primary data collection. The company is seeking a partner SME in Germany to develop a technology cooperation project and apply to a joint funding program via NRC IRAP in Canada and ZIM in Germany. Partnerships considered: Research cooperation agreement

[AI platform for automated energy flexibility, cost management, and carbon reduction](#)

Update: 2021-04-12 - Deadline: 2022-04-13

The UK SME has developed a unique Artificial Intelligence (AI) driven platform for optimising energy capacity, reducing carbon footprint and harnessing energy flexibility within commercial premises. They are seeking commercial and technical cooperation with non-domestic energy users such as factories, offices, schools, retailers and hospitality etc. which are considering future energy strategies and reducing carbon footprint.

[Dutch manufacturer of voice communication systems for air traffic and maritime traffic controllers](#)

Update: 2021-04-16 - Deadline: 2022-04-17

A Dutch manufacturer of voice communication systems for air traffic and maritime traffic controllers is looking for system integrators active in offshore wind industry. The company is looking for system integrators to implement their technology with partners in offshore wind projects in the framework of commercial agreements with technical assistance or research cooperation.

[An ultra-low power hardware module that plugs any sensor or device coding-free into the internet ecosystems](#)

Update: 2021-04-15 - Deadline: 2022-04-16

An East of England start-up company has launched an ultra-low power WiFi module and platform, which allows connected device makers to prove their ideas in minutes and make end-user products ready to market in a few days without writing any code. Solution providers of automation systems, home automation, security providers, monitoring systems and the like are sought to acquire the design or the modules under license agreements.

[New X-ray imaging technology to enhance image quality, lower X-ray dose and contrast material volume in angiography and fluoroscopy applications](#)

Update: 2021-04-14 - Deadline: 2022-04-15

A Hungarian SME has developed a new X-ray imaging method to visualize blood vessel structure and peripheral artery pathologies. The patented technology reduces necessary X-ray dose to 70% and contrast material volume to 50% for many X-ray fluoroscopy and angiography applications. The company is open to build partnership with medical X-ray instrument manufacturers, hospitals for joint R&D projects and with partners interested in the EU and USA markets. The technology is ready for licensing.

[French producer of a plug and play device to prevent cyberattacks is looking for technical cooperation agreements](#)

Update: 2021-04-14 - Deadline: 2022-04-15

The SME, located in Southern France, produces a plug and play device to prevent its clients from potential cyber attacks. Cyber prevention is usually very costly and not continuous, hence this innovative solution represents a sustainable response to this growing challenge. The device represents a preventive solution to protect companies from cybercrime by detecting risks and producing 24/7 audit reports. To accelerate its growth, the SME is looking for technical cooperation agreements in the EU.

[Serious games for the autonomous measurement of balance and its rehabilitation are offered for research or technical cooperation agreements.](#)

Update: 2021-04-12 - Deadline: 2022-04-13

A Spanish research team experienced in the field of serious games and its application for rehabilitation, has developed an interactive system for measuring one of the most used balance tests in clinics, and performing rehabilitation exercises using RGBD devices (colour and depth cameras). For its actual deployment at home, the team is looking for companies in the field of technology and healthcare or elderly care to make a prototype based on a research or a technical cooperation agreement.

[Consultancy and development services offered in the area of distributed clock synchronisation for data acquisition purposes.](#)

Update: 2021-04-12 - Deadline: 2022-04-13

A Cypriot start-up specialising in data acquisition, signal processing, distributed clock synchronisation, underwater acoustics, and electronic hardware prototyping aspires to engage in Services cooperation agreements with interested parties. Consultancy and development services are offered for fulfilling real-time data acquisition requirements. Methodologies and hardware/software have been developed to provide streams of synchronised data from a large number of analogue sources

[A French company is looking for distributors worldwide for robot integration in automotive and non-automotive industry](#)

Update: 2021-04-14 - Deadline: 2022-04-15

A French company designing, selling and commissioning robot integration for the automotive, aerospace, pharmaceutical and general industries is looking for agents and/or distributors for cooperation under distribution services and/ or commercial agency agreements to expand on new markets.

[IT Romanian company is interested to collaborate, based on outsourcing agreement or subcontracting agreement, with interested partners on web development, mobile development, desktop applications and cloud solutions](#)

Update: 2021-04-19 - Deadline: 2022-04-20

The Romanian software outsourcing company is located in North-Eastern part of Romania and it is focused on web development, mobile development, desktop applications and cloud solutions. The company is offering outsourcing services or subcontracting agreement since own teams can adapt to either work as a remote extension of clients' teams or as fully autonomous teams that can design and deliver a product according to the clients' specifications.

[Czech company offers expert system for the interpretation of biomarkers, hormones, and other laboratory results in oncology, thyreology and reproduction endokrinology under license or commercial agency agreement](#)

Update: 2021-04-20 - Deadline: 2022-04-21

A Czech company has developed a biomarkers-based diagnostic software allowing physicians carrying out diagnosis of tumours or diagnostics of recurrence using large volume data from thousands of patients. Company is looking for partners from medical sector which could implement the expert system or producer of eHealth product under license agreement or company for selling software product under commercial agency agreement.

[Israeli software company with cutting-edge management platform for security systems offers license agreements](#)

Update: 2021-04-13 - Deadline: 2022-04-14

An Israeli software company founded in 2013, developed a simple and easy platform to manage the entire security system for small to medium organizations. The company provides an easy-to-operate, yet efficient, platform for managing all aspects of security systems of organizations. The company is looking for resellers of software in the field of security systems under license agreement or to connect with integrators under subcontracting agreements.

[German full-service e-learning provider seeks partners from companies, universities and public institutions for license agreements](#)

Update: 2021-04-16 - Deadline: 2022-04-17

An innovative e-learning provider from Northern Germany develops tailor-made e-learning solutions such as online study courses or online training courses for companies, universities and public institutions. It offers for instance license agreements based on an all-in-one solution: from the development of a course concept to production and platform provision. As the e-learning provider is a subsidiary company of a university, it early integrates current trends in the e-learning sector.

[A Turkish company specialized in information technology service management and enterprise-level application development looks for license agreements](#)

Update: 2021-04-14 - Deadline: 2022-04-15

A Turkish IT company that has been specialized in information technology service management (ITSM), call-centre operation management, customer service management and enterprise-level application development looks for license agreement partners to increase its market share abroad.

[A Turkish technology company developing vendor and technology independent network observability solutions seeks commercial agency agreements](#)

Update: 2021-04-20 - Deadline: 2022-04-21

A Turkish IT company develops end-to-end network observability tools to support network operators' daily operations. The company uses cross-domain correlation and real-time reports to reduce operators' operation and capital expenses, which creates cost savings. The company is looking for commercial agencies.

[Swedish SME specialized in high precision automation solutions is looking for distributors and agents](#)

Update: 2021-04-12 - Deadline: 2022-04-13

The Swedish SME is a supplier of nanometer precision automation solutions for high precision microscopy, analysis equipment and production equipment. The SME provides a plug & play solution of high precision piezo stages as well as customized stages and customer specific solutions. The SME is looking for distributors and agents that have end customers in the life science and/or the semiconductor industry but also for manufacturers of equipment for those industries.

[French company seeks software licensees for its 3D real time test benches dedicated to the development of mobile robotic systems, drone and intelligent vehicles](#)

Update: 2021-04-13 - Deadline: 2022-04-14

A French company specialized in monitoring control, perception and software has developed a platform for hardware in the loop (HIL) 3D and real-time simulation to develop instrumented systems like autonomous robots, drones or vehicles. The purpose of this tool for tests and simulation, allows users to test and validate algorithms before using them with real vehicles in real conditions. The company is looking for software resellers under a license agreement.

[Software and hardware solution and test services from a Chinese IT company open to partnership through commercial agency agreement](#)

Update: 2021-04-12 - Deadline: 2022-04-13

The Chinese company supplies systems and products in the areas of electronics, electromechanics, and software and hardware designs for business clients in telecommunications, medical technology, industry, defence and many other sectors. The company is offering software and hardware testing service to its clients in the Chinese market, and aims to expand its business horizon abroad through signing commercial agency agreement with new foreign partners.
