Oportunidades de cooperación tecnológica: Búsquedas de Socios

[M-ERANET: New strategies for advanced material-based technologies for health applications. Development of a conductive material for 3D printing aimed at health applications and silver economy. Industrial partner sought for validation of the material](#)

Update: 2021-05-17 - Deadline: 2021-05-31

Basque (north of Spain) 3D printing SME has teamed up with a local technology centre, a university and another SME for the development of a special material suitable for rehabilitation treatments. The four organizations wish to complete a consortium with partner(s) who will have to test, validate and propose different applications for the new material under the ERA-NET Cofund M-eranet Call 2021 within research cooperation agreements.

Oportunidades de cooperación tecnológica: Demandas

[Development of an exhaust gas cleaning system using electrically conductive ceramics and modification of existing ceramic materials](#)

Update: 2021-05-17 - Deadline: 2022-05-18

A Bavarian Start-up, founded in 2020, offers the service to develop technical ceramic products according to customer ideas. For the development of an exhaust gas cleaning system, a partner from the field of high-temperature brazing for technical ceramics is sought as a manufacturing agreement by subcontracting

Oportunidades de cooperación tecnológica: Ofertas

[A Polish research institute specialised in robotics and automation offers beveling technology](#)

Update: 2021-05-19 - Deadline: 2022-05-20

A Polish research institute of robotics and automation offers innovative beveling technology for industry. This robotic technology can be used for beveling (chamfering) parts made of metal plates. The institute is seeking commercial agreements with technical assistance with manufacturers from various branches, such as the automotive branch, metal processing, mechanical engineering.

[Slovak company conducting chemical research and producing chemical specialties and fine chemicals is offering analytical services and external research capacities in the field of petrochemical and organic synthesis, processes and products](#)

Update: 2021-05-10 - Deadline: 2022-05-11

The Slovak company has been one of the leading central EU companies conducting industrial research in the area of organic chemistry. The research focuses primarily on petrochemical and other organic synthesis, processes and products to the level of technological foundations for new production facilities. The company would like to offer its external research capacities and analytical services under research cooperation.

[An established Slovak research institute has developed a pressure sensor for extreme conditions and is looking for licensees or investors](#)

Update: 2021-05-14 - Deadline: 2022-05-15

An established Slovak scientific and research institute has developed a piezoelectric pressure sensor based on GaN material substrate, intended to operate in extreme conditions of high temperature and chemically aggressive environment, with high electron mobility transistor (HEMT) as sensing element. The preferred cooperation types are license agreement or financial agreement.

[An established Slovak research institute has developed a novel probe for realization of local charge transient analysis and is looking for licensees or investors](#)

Update: 2021-05-10 - Deadline: 2022-05-11

Established Slovak scientific and research institute has developed a novel probe for realization of local charge transient analysis. Charge transient microscopy displays the relief or other characteristic of the surface layer with high spatial resolution using a scanning transient microscope probe placed and moved in a short distance from the displayed surface. The preferred cooperation types are license agreement and financial agreement.

[Established Slovak research institute with research institutes have developed novel ultra-lightweight superconductor wire and seek licensees or investors](#)

Update: 2021-05-13 - Deadline: 2022-05-11

Established Slovak scientific and research institutes have developed a novel ultra-lightweight superconductive wire based on magnesium diboride (MgB₂) core stabilized with unique aluminum (Al) composite sheath. The preferred cooperation types are license agreement or financial agreement. Specified more in the Partner Sought.

[Established Slovak research institute has developed a unique metal composite material for implants and is looking for licensees or investors](#)

Update: 2021-05-14 - Deadline: 2022-05-15

An established Slovak scientific and research institute in cooperation with a well-known university has developed a novel metal composite material for biomedical implants. The composite material fabricated via powder metallurgy comprises bioinert titanium (Ti) matrix and biodegradable component, in particular magnesium (Mg). The material is suited for applications subjected to intense mechanical loading. The preferred cooperation types are license agreement and financial agreement.

[A Finnish research institute is looking for partners interested in novel methods for reducing nitrate content in leafy greens for licensing or research cooperation agreement in Japan, the USA, the Netherlands, Spain and Denmark](#)

Update: 2021-05-11 - Deadline: 2022-05-12

A Finnish research institute specialized in bioeconomy solutions and sustainable use of natural resources is looking for partners from the chemical, fertilizer and greenhouse industry for testing and further developing a method and a preparation to reduce nitrate content in hydroponically cultivated leafy salad crops in greenhouses or plant factories. Partners for licensing and research cooperation agreement are sought in Japan, the USA, Netherlands, Spain and Denmark.

[Demulsifier / 1-stage process for simple treatment and disposal of used water-mixable cooling lubricant emulsions](#)

Update: 2021-05-10 - Deadline: 2022-05-11

A German SME specialized in processes and chemicals for industrial wastewater treatment and disposal has developed a demulsifier and 1-stage process allowing easy treatment and disposal of used water-mixable cooling lubricant emulsions, generated during mechanical processing of metallic and non-metallic workpieces. The new process reduces treatment time and disposal costs. The SME looks for a commercial agreement with technical assistance. A distribution agreement might also be possible.

[Non-mathematical and quantum-proof data cryptography method using randomness](#)

Update: 2021-05-13 - Deadline: 2022-05-14

A German IT developer has developed a quantum-safe data encryption method. It is non-mathematical, random-based and has just been patented. Its innovative character lies in proving that randomly encrypted data can be decrypted after all. The company looks for partners from the IT sector, preferably with a link to IT security, for licence agreements or technical cooperation agreements to further improve the technology.

[Swedish SME with a new innovative low cost actuator for large dual solar trackers and heliostats is looking for technical cooperation agreement with partners that are active in renewable energy](#)

Update: 2021-05-13 - Deadline: 2022-05-14

A Swedish SME company is developing a novel and innovative long stroke actuator technology for large dual axis solar trackers and heliostats to reduce actuator cost and structure weight considerably with a three-legged solution, increasing the efficiency of the solar panels. The company is looking for technical cooperation on the development and production of solar tracker and heliostats. The desired partner is a company that manufactures and/or installs solar trackers and heliostats.

[Design, prototyping and manufacturing of medical devices thanks to 3D printing using medical polymers](#)

Update: 2021-05-13 - Deadline: 2022-05-14

French start-up expert in production of medical grade 3D printing filaments offers its services for designing, prototyping and producing implantable and / or resorbable medical devices. Health professionals, academic and industrial partners are sought for manufacturing, research or technical cooperation agreement.

[German engineering company offers ultra-high performance concrete \(UHPC\) and engineering advice for machinery and construction industry](#)

Update: 2021-05-18 - Deadline: 2022-05-19

A German company, specialised for the development, production and trade of ultra-high performance concrete, offers their special products and technical know-how to companies from the mechanical engineering, machine tool and/or construction industry to implement their own projects. Cooperation within a technical cooperation agreement is sought.

[Compact-GC: a microsystems-based gas-chromatographic platform](#)

Update: 2021-05-18 - Deadline: 2022-05-19

An Italian research team developed a completely microsystems-based gas-chromatographic (GC) platform. The proposed technology allows for the miniaturization of advanced analytical capabilities suitable to be integrated in portable high-end gas sensing equipment. Several applications were already demonstrated, but new opportunities can be expected by cooperative research targeting the integration of the platform with other types of detectors. License, research or financial agreements are sought.

Oportunidades de cooperación empresarial: Demandas

[A Russian tattoo company is looking for foreign investors to organize a network of professional tattoo salons in Russia](#)

Update: 2021-05-17 - Deadline: 2022-05-18

A Russian company from Moscow is engaged in certified tattoo applications. At the moment, the company plans to expand due to high demand. The company is interested in finding foreign investors who will provide financial assistance in creating a network of professional tattoo salons in Russia. The company plans to enter into a financial agreement.

[Innovative Danish company offering unique solution for home offices seeks manufacturing partner](#)

Update: 2021-05-11 - Deadline: 2022-05-12

An innovative Danish company specialising in ergonomic furniture has designed and developed a height adjustable office desk, which satisfies the highest technical standards. They are now looking for a serious long-term partner to collaborate with under a manufacturing agreement.

[A Lithuanian freight forwarding company is looking for subcontractors](#)

Update: 2021-05-14 - Deadline: 2022-05-15

The transport company from Lithuania is specializing in freight forwarding. It provides transportation services with its own fleet and with the help of more than 200 subcontracted vehicles. The company is looking for new partners - companies, that have free capacities to transport goods to work under the subcontracting agreement.

[Spanish architecture, interior design and furniture design company is looking for manufacturers and suppliers of sustainable, technological and singular products/services](#)

Update: 2021-05-11 - Deadline: 2022-05-12

A Spanish architecture, interior design, branding and furniture design company is looking for manufacturing and supplying agreements to acquire innovative products/services for its projects. The SME carries out disruptive sustainable projects in the tourism and residential sector, applying technological innovation when possible. The company is committed to take part in projects that contribute to energy saving and are beneficial to the environment.

[A German online food delivery service is looking for an injection / compression molding manufacturer to produce custom lids for its food to-go packaging](#)

Update: 2021-05-12 - Deadline: 2022-05-13

A German sustainable online food delivery service is looking for an injection / compression molding company to manufacture custom food grade lids (silicone and Thermoplastic Rubber (TPE) / Polypropylene (PP) / Polyethylene (PE)) for its food to-go packaging according to the design requirements set by the German company. The company is interested in partnerships in the frame of a manufacturing agreement.

[A Dutch designer is looking for a manufacturer of tailor made brass accessories](#)

Update: 2021-05-11 - Deadline: 2022-05-12

A Dutch accessories designer is looking for a partner who can produce a small batch of custom made brass accessories / hardware for leather accessories like bags and belts. The designer seeks a partner to collaborate under a manufacturing, outsourcing or supplier agreement.

Oportunidades de cooperación empresarial: Ofertas

[Oil hydraulic components for stationary or mobile applications - search for distributors and subcontracting contracts](#)

Update: 2021-05-07 - Deadline: 2022-05-08

A German SME, active in the development and production of a broad range of oil hydraulic components for stationary or mobile applications (agricultural and construction machinery) as well as for power plants, is searching for distribution partners for their products. Furthermore the company is searching for manufacturers of machines who are interested in the integration of the offered oil hydraulic components into their products; the SME offers to act as their subcontractor.

[South Italy logistic company is looking for outsourcing agreement or subcontracting partners](#)

Update: 2021-05-13 - Deadline: 2022-05-14

This company, based in Bari, in the Apulia region of Italy, is specialized in the management of international shipping for import/export of goods to/from any location in the world and logistics (even for dangerous goods). It is looking for outsourcing agreements or subcontracting partners for greater integration.

[Polish manufacturer of chemical products is looking for distributors on foreign markets](#)

Update: 2021-05-10 - Deadline: 2022-05-11

A Polish manufacturer of chemical products operating on the national market wants to expand to foreign markets. The company has experience in developing and producing effective, high-quality products, which are offered to customers at a moderate price. The main group of products are liquids and concentrates for the surfaces' cleaning as well as equipment and cleaning and hygiene products. The company is looking for a partner who would be interested in importing or distributing its products.

[A Polish company, specialized in the production of stylish furniture, is searching for commercial agents and distributors.](#)

Update: 2021-05-14 - Deadline: 2022-05-15

The Polish SME is a modern furniture producing company located in south west of Poland. It offers many different models of furniture such as shelves, beds, bookcases for the living room, coffee tables and tables. The company is interested in expanding its wide range of products into foreign markets throughout the cooperation with new business partners. In order to achieve this purpose, the company is looking for collaboration under distribution services or commercial agency agreements.

[Russian producer of attachments for construction, agricultural and mining any equipment is looking for distributors](#)

Update: 2021-05-10 - Deadline: 2022-05-11

A Russian company from Ivanovo is engaged in the production of high-quality attachments (buckets, road brushes, dumps, lifting and transporting equipment) for any type of special equipment (construction, agricultural and mining) with an extended warranty: for excavators, for front loaders, for backhoe loaders, etc. The company is looking for foreign partners to enter into a distribution services agreement.

[Innovative and leading Danish industrial mixer company seeks distributors in France and Germany](#)

Update: 2021-05-11 - Deadline: 2022-05-12

A Danish company manufactures and sells high quality in-tank mixers, in-line mixers, and powder induction solutions to the European market, either directly or via representatives and importers. Due to high growth during the last few years, the company wants to pursue its competitive advantage and expand even more on the European market and therefore seeks new distributors or agents in France and Germany.

[A young Dutch start up SME that has developed a range of fashionable bags, backpacks, gear and apparel for women is looking for a manufacturing partner](#)

Update: 2021-05-14 - Deadline: 2022-05-15

A company based in the Netherlands, designs, produces and develops women's gear and bags of innovative materials. For the production of the women's bags, they are looking for a new manufacturing partner. The company is interested in a manufacturing agreement.

[Spanish manufacturer of small metal articles on demand, through stamping and injected casting, for tailoring, jewellery, shoemaking, cabinetmaking, military and civil institutions, soughts coloboration under manufacturing or outsourcing agreements](#)

Update: 2021-05-10 - Deadline: 2022-05-11

Spanish company, dedicated to the custom manufacturing of small metal articles, by stamping and casting, such as metal buttons, emblems, labels, badges, uniform accessories, buckles, identification plates, dies, etc., with all kinds of details and finishes, seeks public or private companies, of all sizes, to offer its services under manufacturing agreements or outsourcing agreements.

[German complex und economical cold formed metal parts offered via manufacturing and commercial agency agreements](#)

Update: 2021-05-17 - Deadline: 2022-05-18

A German company is specialised in high-precision components, cold formed parts, turned parts and screw plugs for the automotive, hydraulics, drive technology as well as mechanical and plant engineering sectors. Flexible processes and intelligent methods enable them to respond quickly and manufacture the customer-specific parts at competitive prices. The company offers commercial agency agreements and manufacturing agreements to partners in different countries.

[An Austrian designer and manufacture of outdoor textile products \(except clothes\) offers its services under a subcontracting agreement](#)

Update: 2021-05-11 - Deadline: 2022-05-12

An Austrian company is experienced in individual textile production of outdoor products like tents, solar protection assemblies, trolleys, bags, avalanche airbags, hammocks etc. (not clothes) and works with Asian sewing partners. It offers its prototyping and quality management services to production companies worldwide under manufacturing and subcontracting agreements.

[German manufacturer of diamond tools is looking for commercial agency agreement or distribution services agreement](#)

Update: 2021-05-14 - Deadline: 2022-05-15

A German company, specialised in the manufacturing of diamond tools for natural stone or industrial applications, is looking for commercial agency agreement or distribution services agreement. To increase sales further it is now looking to expand into new territories and is looking for experienced distributors or agents in the diamond tools sector. The company has a 150 years of experience in the field of diamond tools and offers full technical support.

[Portuguese company specialized in integrated automation systems wants to establish manufacturing agreement](#)

Update: 2021-05-17 - Deadline: 2022-05-18

This Portuguese company was founded in 2005 and specializes mainly in integrated automation systems for developing special machines, industrial systems and electrical cabinets. The company is interested in signing manufacturing agreements with foreign partners.

[A transformative Israeli construction-planning technology start-up is looking for clients and partners under subcontracting](#)

Update: 2021-05-11 - Deadline: 2022-05-12

This Israeli start-up has developed an automated construction planning solution for real estate developers and constructors, allowing them to plan and build faster, smarter and more efficiently. It uses artificial intelligence algorithms to execute the planning process similarly to software development – make the process automated, efficient, and optimized for the client's needs. The company is looking for subcontracting clients in the fields of real estate, construction and architecture.

[A Turkish company specialised in rock crushing machines looks for distributors, commercial agents and offers manufacturing agreements](#)

Update: 2021-05-17 - Deadline: 2022-05-18

A dynamic Turkish company has been manufacturing rock crushing machines. The company has been engaged in transnational cooperation and is ISO 9001:2015 and CE certified. The company looks for reliable distributors and commercial agents with an extensive knowledge and network in mining and construction sector. Furthermore, the company offers manufacturing agreement to produce specially designed products upon customers' demand.
