

## Boletín de Oportunidades de Cooperación: Medio Ambiente - 24/5/2021

Oportunidades de cooperación tecnológica: Búsquedas de Socios

Oportunidades de cooperación tecnológica: Demandas

Oportunidades de cooperación tecnológica: Ofertas

[Spanish technology consultant offers a smart notification service for drives and shared drives to alert of all the events that happen in the documents. This software allows protection of confidential files, and not miss any changes in the folder.](#)

*Update: 2021-05-18 - Deadline: 2022-05-19*

Spanish company working on technology solutions in the cloud has developed an application to monitor all events stored in the folders. This software allows controlling any changes that people have made in the documents. It allows alerts on the processes of the tasks and to continue with the operations. The company offers themselves as partners to cooperate in the digital transformation process under a commercial agreement with technical assistance.

[Established Slovak research institute with research institutes have developed novel ultra-lightweight superconductor wire and seek licensees or investors](#)

*Update: 2021-05-13 - Deadline: 2022-05-11*

Established Slovak scientific and research institutes have developed a novel ultra-lightweight superconductive wire based on magnesium diboride (MgB<sub>2</sub>) core stabilized with unique aluminum (Al) composite sheath. The preferred cooperation types are license agreement or financial agreement. Specified more in the Partner Sought.

[Demulsifier / 1-stage process for simple treatment and disposal of used water-mixable cooling lubricant emulsions](#)

*Update: 2021-05-10 - Deadline: 2022-05-11*

A German SME specialized in processes and chemicals for industrial wastewater treatment and disposal has developed a demulsifier and 1-stage process allowing easy treatment and disposal of used water-mixable cooling lubricant emulsions, generated during mechanical processing of metallic and non-metallic workpieces. The new process reduces treatment time and disposal

costs. The SME looks for a commercial agreement with technical assistance. A distribution agreement might also be possible.

#### [Innovative system for monitoring manholes](#)

*Update: 2021-05-18 - Deadline: 2022-05-19*

An Italian SME has developed an innovative technology to prevent road flooding through constant monitoring of drains and manholes with the installation of remote internet of things (IoT) sensors. The system collects the information coming from the sensors and displays it through a dashboard/smartphone to plan ordinary and extraordinary maintenance interventions. The Company is looking for a commercial agreement with technical assistance, service/ licence agreement, mainly in Europe and the USA.

#### [Non-recyclable waste to become urban design objects](#)

*Update: 2021-05-17 - Deadline: 2022-05-18*

An Italian company has developed a process for the storage of non recyclable waste into glass objects for urban design. The objects result of the process, are patented, and may be further exploited into furniture objects in cities. The company is interested in finding public partners (municipalities), or private partners (engineering companies, construction, furniture companies), to develop real use cases and start commercialization (joint venture or technical cooperation).

## Oportunidades de cooperación empresarial: Demandas

#### [Spanish architecture, interior design and furniture design company is looking for manufacturers and suppliers of sustainable, technological and singular products/services](#)

*Update: 2021-05-11 - Deadline: 2022-05-12*

A Spanish architecture, interior design, branding and furniture design company is looking for manufacturing and supplying agreements to acquire innovative products/services for its projects. The SME carries out disruptive sustainable projects in the tourism and residential sector, applying technological innovation when possible. The company is committed to take part in projects that contribute to energy saving and are beneficial to the environment.

## Oportunidades de cooperación empresarial: Ofertas

#### [Swiss manufacturer for sustainable and economical soil enhancers and plant strengtheners products is looking for distribution partners in technology for agriculture](#)

*Update: 2021-05-18 - Deadline: 2022-05-19*

A Swiss SME develops and manufactures sustainable and economical products for soil and plant treatment. All products are manufactured in Switzerland under certified quality standards. Customers benefit from long-term cost-efficient, yield-increasing solutions for a future-oriented and healthy agriculture. The company is looking for new distribution partners.

#### [A Belgian company offering a full water dynamisation solution for home, restaurants & hotels is looking for distribution agreements](#)

*Update: 2021-05-10 - Deadline: 2022-05-11*

A Belgian company has developed and manufactured a filter and a biodynamizer able to produce dynamized water. The solution is a hydrodynamic and magnetic device that reproduces the natural cycle of water in an accelerated way by copying the movements of water that has flowed

freely in nature. This 100% natural technology regenerates water to make it comparable to living, natural water. The company is looking for distributors.

[Italian environmental monitoring company looking to sign distribution services agreement](#)

*Update: 2021-05-11 - Deadline: 2022-05-12*

The company, based in Northern Italy, is a supplier of air quality and emissions sampling systems, long-term micropollutants emission samplers, gravimetric dust samplers, industrial hygiene devices and combustion control analysers. Its mission is to design products compliant to European, US EPA and ISO standards, to improve productivity of environmental engineers, and to reduce off-spec products in industrial processes. The company looks for signing distribution services agreements.
